**CRS Report for Congress**

*Prepared for Members and Committees of Congress*

## Summary

Congress has debated the efficacy and constitutionality of federal regulation of firearms and ammunition, with strong advocates arguing for and against greater gun control. The tragic shootings in Tucson, AZ, on January 8, 2011, in which six people were killed and 13 wounded, including Representative Gabrielle Giffords, could prompt the 112<sup>th</sup> Congress to examine issues related to the shooter's mental illness and drug use and his use of large capacity ammunition feeding devices (LCAFDs) (see H.R. 308 and S. 32), as well as a proposal to ban firearms within the proximity of certain high-level federal officials (see H.R. 496).

This report provides basic firearms-related statistics, an overview of federal firearms law, and a summary of legislative action in the 111<sup>th</sup> Congress and selected legislative action in the 110<sup>th</sup> Congress that involved issues revisited in the 111<sup>th</sup> Congress. The report concludes with a discussion of other salient issues that have generated significant congressional interest in the past, including the 1994-2004 LCAFD ban.

During the 111<sup>th</sup> Congress, the gun control debate was colored by two key Supreme Court findings. In *District of Columbia v. Heller*, the Court found that the District of Columbia (DC) handgun ban violated an individual's right under the Second Amendment to lawfully possess a firearm in his home for self-defense. In *McDonald v. City of Chicago*, the Court found that an individual right also applied to the states. The 111<sup>th</sup> Congress considered amendments to DC voting rights bills that would have further overturned DC gun laws (S. 160 and H.R. 157), effectively scuttling the House bill. In addition, pro-gun Members passed several other gun-related provisions that were included in enacted legislation. These provisions address

- carrying firearms on public lands (P.L. 111-24),
- transporting firearms in passenger luggage on Amtrak (P.L. 111-117),
- widening law enforcement off-duty concealed carry privileges (P.L. 111-272), and
- prohibiting data collection on gun ownership or higher premiums for gun owners who are beneficiaries of healthcare wellness programs (P.L. 111-148).

The 111<sup>th</sup> Congress reconsidered or newly considered several other provisions that were not enacted. These issues could re-emerge in the 112<sup>th</sup> Congress. These provisions address

- veterans adjudicated as mentally incompetent and loss of gun rights (S. 669 and H.R. 6132),
- firearms possession in public housing (H.R. 3045 and H.R. 4868),
- interstate reciprocity of concealed carry privileges (S. 1390 and S. 845), and
- the treatment of firearms under bankruptcy proceedings (H.R. 5827/S. 3654).

Other salient and recurring gun control issues that have generated past congressional interest include (1) screening firearms background check applicants against terrorist watch lists; (2) reforming the regulation of federally licensed gun dealers; (3) requiring background checks for private firearms transfers at gun shows; (4) more-strictly regulating certain firearms previously defined in statute as "semiautomatic assault weapons"; and (5) banning or requiring the registration of certain long-range .50 caliber rifles, which are commonly referred to as "sniper" rifles.

## Recent Developments

The 112<sup>th</sup> Congress could possibly examine issues potentially arising from the tragic shootings in Tucson, AZ, on January 8, 2011, in which six people were killed and 13 wounded, including Representative Gabrielle Giffords. Armed with a 9mm Glock 19 semiautomatic pistol loaded with a 33-round extended magazine, the shooter reportedly fired 31 shots before bystanders were able to subdue him while he was attempting to reload with another 33-round extended magazine. He also carried two additional 15-round magazines.<sup>1</sup> As discussed below, these magazines were previously defined under federal law as large capacity ammunition feeding devices (LCAFDs) and were banned from September 13, 1994, through September 13, 2004, as part of the larger semiautomatic assault weapons ban. Legislation has been introduced to reinstate the LCAFD ban (H.R. 308 and S. 32). Congressional interest could also focus on the shooter's mental illness and drug use, as well as a proposal to ban firearms within the proximity of certain high-level federal officials (H.R. 496).

## Legislative Action in the 111<sup>th</sup> Congress

During the 111<sup>th</sup> Congress, the gun control debate was colored by two key Supreme Court decisions. In *District of Columbia v. Heller*, the Court found that the District of Columbia (DC) handgun ban violated an individual's right under the Second Amendment to lawfully possess a firearm in his home for self-defense.<sup>2</sup> In *McDonald v. City of Chicago*, the Court found that an individual's right to lawfully possess a firearm for the purposes of self-defense under the Second Amendment applied to the states by way of the Fourteenth Amendment.<sup>3</sup> Although the decision arguably limits a state's, city's, or local government's ability to prohibit handguns outright, it does not precisely delineate what would constitute permissible gun control laws under the Second Amendment. Consequently, these delineations will likely be developed in future cases.

In the 111<sup>th</sup> Congress, Members revisited several gun control issues that were previously considered in the 110<sup>th</sup> Congress. For example, pro-gun Members in the House of Representatives, who were dissatisfied with the District's response to the *Heller* decision, passed a bill in the 110<sup>th</sup> Congress that would have overturned provisions of the District's revised gun laws (for further discussion, see p. 14). In the 111<sup>th</sup> Congress, pro-gun Members of the Senate amended and passed a DC voting rights bill (S. 160) with similar language.<sup>4</sup> When the House turned its attention to DC voting rights, the leadership attempted to negotiate a compromise but ultimately tabled its version of the DC voting rights bill (H.R. 157) rather than risk amendments to overturn DC guns laws. These amendments were introduced as stand-alone bills (H.R. 5162/S. 3265).

<sup>3</sup> For further information, see CRS Report R40820, *The Second Amendment and Incorporation: An Overview of McDonald v. City of Chicago*, by Vivian S. Chu.

<sup>4</sup> For further information, see CRS Report R40474, *D.C. Gun Laws and Proposed Amendments*, by Vivian S. Chu.

Pro-gun Members sponsored several provisions that were enacted. Senator Tom Coburn successfully amended the Credit CARD Act of 2009 (H.R. 627) with a provision that allows people to carry firearms in national parks and wildlife refuges. The House voted on the Coburn amendment as a separate measure and passed it as well (P.L. 111-24). Senator Roger Wicker amended the FY2010 Transportation-HUD Appropriations bill (H.R. 3288) with language to authorize private persons to carry firearms in their checked luggage on Amtrak trains. H.R. 3288 became the vehicle for the Consolidated Appropriations Act, 2010 (P.L. 111-117), which included the Wicker provision. Congress also reconsidered and passed amendments to the Law Enforcement Officers Safety Act (LEOSA; P.L. 108-277) to clarify and widen eligibility for certain qualified police officers to carry concealed firearms across state lines (S. 1132; P.L. 111-272).

Pro-gun Members sponsored several provisions that were considered or reconsidered but were not enacted. In the 110<sup>th</sup> Congress, the Senate Veterans' Affairs Committee approved a bill (S. 2969) that Senator Richard Burr amended to include a provision that would have revamped procedures by which veterans are adjudicated as "mentally incompetent" and, thus, lose their firearms eligibility. In the 111<sup>th</sup> Congress, the Senate Veterans' Affairs Committee reported stand-alone legislation that would have addressed this issue (S. 669). The House Veterans' Affairs Committee considered a draft veterans' benefits bill that Representative John Boozman amended with a similar provision. However, when the House considered the reported bill (H.R. 6132) under suspension of the rules, it was called to the floor without the Boozman provision.

In addition, the Senate considered an amendment offered by Senator John Thune to the FY2010 Defense Authorization Act (S. 1390) that was narrowly defeated and arguably would have provided for national reciprocity between states regarding the concealed carry of firearms. The House Financial Services Committee reported a bill (H.R. 3045; H.Rept. 111-277) that included a provision that would have prohibited public housing authorities from barring tenants from possessing legal firearms as a condition of their lease. This committee approved another housing bill that included a similar provision (H.R. 4868). And the House passed amendments (H.R. 5827) to federal bankruptcy law that would have allowed persons to claim either a single firearm or a collection of firearms of up to \$3,000 in value as a federal exemption.

The Senate Committee on Homeland Security and Governmental Affairs held a hearing on denying firearms to persons watch-listed as known or suspected terrorists (S. 1317/H.R. 2159 and S. 2820). And, on at least two occasions, the Senate Committee on the Judiciary scheduled a hearing on a bill to reform federal statutes under which federally licensed firearms dealers are regulated (S. 941/H.R. 2296). Gun trafficking across the Southwest border from the United States to Mexico has been an emerging concern for Congress.<sup>5</sup> The Consolidated Appropriations Act, 2010 (P.L. 111-117), included increased funding for the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) to investigate additional gun trafficking cases.<sup>6</sup> In addition, Congress provided ATF with a FY2010 supplemental appropriation to combat further Southwest border gun trafficking (P.L. 111-230). Congress also altered, but continued to make permanent, a funding limitation on the release of ATF firearms trace data.

## Background and Analysis

### Pro/Con Debate

Through the years, legislative proposals to restrict the availability of firearms to the public have raised the following questions: What restrictions on firearms are permissible under the Constitution? Does gun control constitute crime control? Can the nation's rates of homicide, robbery, and assault be reduced by the stricter regulation of firearms commerce or ownership? Would restrictions stop attacks on public figures or thwart deranged persons and terrorists? Would household, street corner, and schoolyard disputes be less lethal if firearms were more difficult and expensive to acquire? Would more restrictive gun control policies have the unintended effect of impairing citizens' means of self-defense?

In recent years, proponents of gun control legislation have often held that only *federal* laws can be effective in the United States. Otherwise, they say, states with few restrictions will continue to be sources of guns that flow illegally into more-restrictive states. They believe that the Second Amendment to the Constitution, which states that “[a] well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms shall not be infringed,” is being misread in today's modern society. They argue that the Second Amendment (1) is now obsolete, with the presence of professional police forces; (2) was intended solely to guard against suppression of state militias by the central government and is therefore restricted in scope by that intent; and (3) does not guarantee a right that is absolute, but rather one that can be limited by reasonable requirements. They ask why in today's modern society a private citizen needs any firearm that is not designed primarily for hunting or other recognized sporting purposes. Proponents of firearms restrictions have advocated policy changes on specific types of firearms or components that they believe are useful primarily for criminal purposes or that pose unusual risks to the public. Fully automatic firearms (i.e., machine guns) and short-barreled rifles and shotguns have been subject to strict regulation since 1934. Fully automatic firearms have been banned from private possession since 1986, except for those legally owned and registered with the Secretary of the Treasury as of May 19, 1986. More recently, “Saturday night specials” (loosely defined as inexpensive, small handguns), “assault weapons,” ammunition-feeding devices with capacities for more than seven rounds, and certain ammunition have been the focus of control efforts.

Opponents of gun control vary in their positions with respect to specific forms of control but generally hold that gun control laws do not accomplish what is intended. They argue that it is as difficult to keep weapons from being acquired by “high-risk” individuals, even under federal laws and enforcement, as it was to stop the sale and use of liquor during Prohibition. In their view, a more-stringent federal firearms regulatory system would only create problems for law-abiding citizens, bring mounting frustration and escalation of bans by gun regulators, and possibly threaten citizens' civil rights or safety. Some argue that the low violent crime rates of other countries have nothing to do with gun control, maintaining instead that multiple cultural differences are responsible.

Gun control opponents also reject the assumption that the only legitimate purpose of ownership by a private citizen is recreational (i.e., hunting and target-shooting). They insist on the continuing need of people for effective means to defend themselves and their property, and they point to studies that they believe show that gun possession lowers the incidence of crime. They say that the law enforcement and criminal justice system in the United States has not demonstrated the ability to furnish an adequate measure of public safety in all settings. Some

opponents further believe that the Second Amendment includes a right to keep arms as a defense against potential government tyranny, pointing to examples in other countries of the use of firearms restrictions to curb dissent and secure illegitimate government power. The debate has been intense.

To gun control advocates, the opposition is out of touch with the times, misinterprets the Second Amendment, and is lacking in concern for the problems of crime and violence. To gun control opponents, advocates are naive in their faith in the power of regulation to solve social problems, bent on disarming the American citizen for ideological or social reasons, and moved by irrational hostility toward firearms and gun enthusiasts.

## Gun-Related Statistics

Crime and mortality statistics are often used in the gun control debate. According to a recent study, however, none of the existing sources of statistics provide either comprehensive, timely, or accurate data with which to definitively assess whether there is a causal connection between firearms and violence.<sup>7</sup> For example, existing data do not show whether the number of people shot and killed with semiautomatic assault weapons declined during the 10-year period (1994–2004) that those firearms were banned from further proliferation in the United States.<sup>8</sup> Presented below are data on the following topics: (1) the number of guns in the United States, (2) firearms-related homicides, (3) non-lethal firearms-related victimizations, (4) gun-related mortality rates, (5) use of firearms for personal defense, and (6) recreational use of firearms. In some cases, the data presented are more than a decade old but remain the most recent available.

### How Many Guns Are in the United States?

The National Institute of Justice (NIJ) reported in a national survey that in 1994, 44 million people, approximately 35% of households, owned 192 million firearms, 65 million of which were handguns.<sup>9</sup> Seventy-four percent of those individuals were reported to own more than one firearm.<sup>10</sup> According to the ATF, by the end of 1996 approximately 242 million firearms were available for sale to or were possessed by civilians in the United States.<sup>11</sup> That total includes roughly 72 million handguns (mostly pistols, revolvers, and derringers), 76 million rifles, and 64 million shotguns.<sup>12</sup> By 2000, the number of firearms had increased to approximately 259 million: 92 million handguns, 92 million rifles, and 75 million shotguns.<sup>13</sup> By 2007, the number of firearms had increased to approximately 294 million: 106 million handguns, 105 million rifles, and 83 million shotguns.<sup>14</sup>

<sup>14</sup> U.S. Department of Justice, Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), *Annual Firearm* (continued...)

In the past, most guns available for sale were produced domestically. In recent years, 1 million to 2 million handguns were manufactured each year, along with 1 million to 1.5 million rifles and fewer than 1 million shotguns.<sup>15</sup> From 2001 through 2007, however, handgun imports nearly doubled, from 711,000 to nearly 1.4 million.<sup>16</sup> During the same time period, rifle imports increased from 228,000 to 632,000, and shotgun imports increased from 428,000 to 726,000.<sup>17</sup> Retail prices of guns vary widely, from \$75 or less for inexpensive, low-caliber handguns to more than \$1,500 for higher-end, standard-production rifles and shotguns.<sup>18</sup> Data are not available on the number of “assault weapons” in private possession or available for sale, but one study estimated that 1.5 million assault weapons were privately owned in 1994.<sup>19</sup>

### How Often Are Guns Used in Homicides?

As **Table 1** shows, reports submitted by state and local law enforcement agencies to the FBI and published annually in the *Uniform Crime Reports*<sup>20</sup> indicate that the firearms-related murder rate per 100,000 of the population decreased from 6.6 for 1993 to 3.6 for 2000. The rate held steady at 3.6 for 2001 and fluctuated thereafter between a high of 3.9 for 2006 and a low of 3.3 for 2009.

**Table 1. Firearms-Related Murder Victims, 1993-2009**

Year	Murder Victims	Rate per 100,000 of the Population	Estimated Firearms-Related Murder Victims <sup>a</sup>	Rate per 100,000 of the Population
1993	24,526	9.5	17,069	6.6
1994	23,326	9.0	16,325	6.3
1995	21,606	8.2	14,727	5.6

**Source:** CRS compilation of FBI crime statistics reported annually in the *Uniform Crime Reports*, 1993-2009, and supplementary UCR homicide data reported by the Bureau of Justice Statistics.

- a. The number of firearms-related murder victims was estimated by applying the percentage of firearms-related murders for which the cause of death was known to the number of all reported murder and non-negligent homicide victims for which the cause was known or unknown.

## How Prevalent Are Gun-Related Fatalities?

The source of national data on firearms deaths is the publication *Vital Statistics*, published each year by the National Center for Health Statistics. Firearms deaths reported by coroners are presented in five categories: homicides, legal interventions,<sup>21</sup> suicides, accidents, and unknown circumstances. For these categories, the data are presented below for 1993 through 2007 in two tables, one for all deaths and the other for juvenile deaths.

**Table 2. Firearms-Related Deaths for All Ages**  
1993-2007

Year	Homicides	Legal Interventions	Suicides	Accidents	Unknown	Total Deaths	% Change
1993	18,253	318	18,940	1,521	563	39,596	
1994	17,527	339	18,765	1,356	518	38,506	-2.8%
1995	15,551	284	18,503	1,225	394	35,958	-6.6%
1996	14,037	290	18,166	1,134	413	34,041	-5.3%
1997	13,252	270	17,566	981	367	32,437	-4.7%
1998	11,798	304	17,424	866	316	30,709	-5.3%
1999	10,828	299	16,599	824	324	28,875	-6.0%
2000	10,801	270	16,586	776	230	28,664	-0.7%
2001	11,348	323	16,869	802	231	29,574	3.2%
2002	11,829	300	17,108	762	243	30,243	2.3%
2003	11,920	347	16,907	730	232	30,137	-0.4%
2004	11,624	311	16,750	649	235	29,570	-1.9%

<sup>21</sup> “Legal interventions” include deaths (in these cases by firearms) that involve legal uses of force (justifiable homicide or manslaughter), usually by the police.

Year	Homicides	Legal Interventions	Suicides	Accidents	Unknown	Total Deaths	% Change
2005	12,352	330	17,002	789	221	30,695	3.8%
2006	12,791	360	16,883	642	220	30,897	0.7%
2007	12,632	351	17,352	613	276	31,224	1.1%

Source: National Center for Health Statistics.

As **Table 2** shows, firearms fatalities decreased continuously from 39,595 in 1993 to 28,664 in 2000, for an overall decrease of nearly 28%. Compared with firearms deaths in 2000, such deaths increased by 3.2% in 2001 to 29,574, and increased again, by 2.3%, in 2002 to 30,243. They decreased by 0.3% in 2003 to 30,137, and decreased again, by 1.9%, in 2004 to 29,570. Firearms fatalities increased by 3.8% in 2005 to 30,694, by 0.7% in 2006 to 30,897, and by 1.1% in 2007 to 31,224. Of the 2007 total, 12,983 were homicides or due to legal intervention, 17,352 were suicides, 612 were unintentional (accidental) shootings, and 276 were of unknown causes.<sup>22</sup>

**Table 3. Firearms-Related Deaths for Juveniles**  
1993-2007

Year	Homicides	Legal Interventions	Suicides	Accidents	Unknown	Total Deaths	% Change
1993	1,975	16	832	392	76	3,292	
1994	1,912	20	902	403	81	3,319	0.8%
1995	1,780	16	836	330	72	3,035	-8.6%
1996	1,473	9	720	272	49	2,524	-16.8%
1997	1,308	7	679	247	43	2,285	-9.5%

Source: National Center for Health Statistics.

As **Table 3** shows, there were 1,520 juvenile (younger than 18 years old) firearms-related deaths in 2007. Of the juvenile total, 1,047 were homicides or due to legal intervention, 325 were suicides, 112 were unintentional, and 36 were of unknown causes. From 1993 to 2001, juvenile

<sup>22</sup> National Vital Statistics System data taken from the Injury Statistics Query and Reporting System (WISQARS), available at <http://www.cdc.gov/ncipc/wisqars/default.htm>.

firearms-related deaths decreased by an average rate of 10% annually, for an overall decrease of 56%. From 2001 to 2002, such deaths increased slightly, by less than 1%, but declined by nearly 9% from 2002 to 2003. They increased for the next three years, from 2002 through 2006, by 5% to 7%, but decreased by nearly 5.0% in 2007.<sup>23</sup>

### **How Often Are Guns Used in Non-lethal Crimes?**

The other principal source of national crime data is the *National Crime Victimization Survey* (NCVS) conducted by the U.S. Census Bureau and published by the Bureau of Justice Statistics (BJS). The NCVS database provides some information on the weapons used by offenders, based on victims' reports. Based on data provided by survey respondents in calendar year 2009, BJS estimated that, nationwide, there were 4.3 million non-lethal violent crimes (rape or sexual assault, robbery, aggravated assault, and simple assault).<sup>24</sup> Weapons were used in 22% of these incidents, and firearms were used by offenders in 8% of these incidents.<sup>25</sup> The estimated number of firearms-related non-lethal violent crime incidents decreased from 428,670 in 2000 to 326,090 in 2009, and from 2.4 persons to 1.4 per 100,000 of the population ages 12 and older.<sup>26</sup>

### **How Often Are Firearms Used in Self-Defense?**

According to BJS, NCVS data from 1987 to 1992 indicate that in each of those years, roughly 62,200 victims of violent crime (1% of all victims of such crimes) used guns to defend themselves.<sup>27</sup> Another 20,000 persons each year used guns to protect property. Persons in the business of self-protection (police officers, armed security guards) may have been included in the survey.<sup>28</sup> Another source of information on the use of firearms for self-defense is the National Self-Defense Survey conducted by criminology professor Gary Kleck of Florida State University in the spring of 1993. Citing responses from 4,978 households, Dr. Kleck estimated that handguns had been used 2.1 million times per year for self-defense, and that all types of guns had been used approximately 2.5 million times a year for that purpose during the 1988-1993 period.<sup>29</sup>

Why do these numbers vary by such a wide margin? Law enforcement agencies do not collect information on the number of times civilians use firearms to defend themselves or their property against attack. Such data have been collected in household surveys. The contradictory nature of the available statistics may be partially explained by methodological factors. That is, these and other criminal justice statistics reflect what is *reported* to have occurred, not necessarily the actual number of times certain events occur. Victims and offenders are sometimes reluctant to be candid with researchers. So, the number of incidents can only be estimated, making it difficult to state

with certainty the accuracy of statistics such as the number of times firearms are used in self-defense. For this and other reasons, criminal justice statistics often vary when different methodologies are applied.

Survey research can be limited because it is difficult to produce statistically significant findings from small incident populations. For example, the sample in the National Self-Defense Survey might have been too small, given the likely low incidence rate and the inherent limitations of survey research.

### **What About the Recreational Use of Guns?**

According to NIJ, in 1994 recreation was the most common motivation for owning a firearm.<sup>30</sup> There were approximately 15 million hunters, about 35% of gun owners, in the United States and about the same number and percentage of gun owners engaged in sport shooting in 1994.<sup>31</sup> The U.S. Fish and Wildlife Service (FWS) reported that there were more than 14.7 million persons who were paid license holders in 2003<sup>32</sup> and, according to the National Shooting Sports Foundation, in that year approximately 15.2 million persons hunted with a firearm and nearly 19.8 million participated in target shooting.<sup>33</sup> The FWS reported that there were 14.4 million paid license holders in 2010.<sup>34</sup>

## **Federal Regulation of Firearms**

Two major federal statutes regulate the commerce in and possession of firearms: the National Firearms Act of 1934 (26 U.S.C. § 5801 et seq.) and the Gun Control Act of 1968, as amended (18 U.S.C. Chapter 44, § 921 et seq.). Supplementing federal law, many state firearms laws are stricter than federal law. For example, some states require permits to obtain firearms and impose a waiting period for firearms transfers. Other states are less restrictive, but state law cannot preempt federal law. Federal law serves as the minimum standard in the United States.

### **The National Firearms Act (NFA)**

The NFA was originally designed to make it difficult to obtain types of firearms perceived to be especially lethal or to be the chosen weapons of “gangsters,” most notably machine guns and short-barreled long guns. This law also regulates firearms, other than pistols and revolvers, that can be concealed on a person (e.g., pen, cane, and belt buckle guns). It taxes all aspects of the manufacture and distribution of such weapons, and it compels the disclosure (through registration with the Attorney General) of the production and distribution system from manufacturer to buyer.

## **The Gun Control Act of 1968 (GCA)**

As stated in the GCA, the purpose of federal firearms regulation is to assist federal, state, and local law enforcement in the ongoing effort to reduce crime and violence. In the same act, however, Congress also stated that the intent of the law is not to place any undue or unnecessary burdens on law-abiding citizens in regard to the lawful acquisition, possession, or use of firearms for hunting, trapshooting, target shooting, personal protection, or any other lawful activity.

The GCA, as amended, contains the principal federal restrictions on domestic commerce in small arms and ammunition. The statute requires all persons manufacturing, importing, or selling firearms *as a business* to be federally licensed; prohibits the interstate mail-order sale of all firearms; prohibits interstate sale of handguns generally and sets forth categories of persons to whom firearms or ammunition may not be sold, such as persons under a specified age or with criminal records; authorizes the Attorney General to prohibit the importation of non-sporting firearms; requires that dealers maintain records of all commercial gun sales; and establishes special penalties for the use of a firearm in the perpetration of a federal drug trafficking offense or crime of violence.

As amended by the Brady Handgun Violence Prevention Act, 1993 (P.L. 103-159), the GCA requires background checks be completed for all non-licensed persons seeking to obtain firearms from federal firearms licensees. Private transactions between persons “not engaged in the business” are not covered by the recordkeeping or the background check provisions of the GCA. These transactions and other matters such as possession, registration, and the issuance of licenses to firearms owners may be covered by state laws or local ordinances. For a listing of other major firearms and related statutes, see the **Appendix**.

### **Firearms Transfer and Possession Eligibility**

Under current law, there are nine classes of persons prohibited from possessing firearms: (1) persons convicted, or under indictment, in any court of a crime punishable by imprisonment for a term exceeding one year; (2) fugitives from justice; (3) drug users or addicts; (4) persons adjudicated as mental defectives or committed to mental institutions; (5) unauthorized immigrants and most non-immigrant visitors; (6) persons dishonorably discharged from the Armed Forces; (7) persons who have renounced their U.S. citizenship; (8) persons under court-order restraints related to harassing, stalking, or threatening an intimate partner or child of such intimate partner; and (9) persons convicted of misdemeanor domestic violence (18 U.S.C. § 922(g) and (n)).

Since 1994, moreover, it has been a federal offense for any non-licensed person to transfer a handgun to anyone younger than 18 years old. It has also been illegal for anyone younger than 18 years old to possess a handgun (there are exceptions to this law related to employment, ranching, farming, target practice, and hunting) (18 U.S.C. § 922(x)).

### **Licensed Dealers and Firearms Transfers**

Under current law, federal firearms licensees (hereafter referred to as licensees) may ship, transport, and receive firearms that have moved in interstate and foreign commerce. Licensees are currently required to verify with the FBI through a background check that non-licensed persons are eligible to possess a firearm before subsequently transferring a firearm to them. Licensees

must also verify the identity of non-licensed transferees by inspecting a government-issued identity document (e.g., a driver's license).

Licenses may engage in interstate transfers of firearms among themselves without conducting background checks. Licensees may transfer long guns (rifles and shotguns) to out-of-state residents, as long as the transactions are face-to-face and not knowingly in violation of the laws of the state in which the unlicensed transferees reside. Licensees, however, may *not* transfer handguns to unlicensed out-of-state residents. Transfer of handguns by licensees to anyone younger than 21 years old is also prohibited, as is the transfer of long guns to anyone younger than 18 years old (18 U.S.C. §922(b)). Also, licensees are required to submit "multiple sales reports" to the Attorney General if any person purchases two or more handguns within five business days.

Furthermore, licensees are required to maintain records on all acquisitions and dispositions of firearms. They are obligated to respond to ATF agents requesting firearms tracing information within 24 hours. Under certain circumstances, ATF agents may inspect, without search warrants, their business premises, inventory, and gun records.

### **Private Firearms Transfers**

Non-licensees are prohibited from acquiring firearms from out-of-state sources (except for long guns acquired from licensees under the conditions described above). Non-licensees are also prohibited from transferring firearms to any persons who they have reasonable cause to believe are not residents of the state in which the transaction occurs. In addition, since 1986 it has been a federal offense for non-licensees to knowingly transfer a firearm to prohibited persons. It is also notable that firearms transfers initiated through the Internet are subject to the same federal laws as transfers initiated in any other manner.<sup>35</sup>

## **Brady Handgun Violence Prevention Act**

After seven years of extensive public debate, Congress passed the Brady Handgun Violence Prevention Act of 1993 (P.L. 103-159, the Brady Act)<sup>36</sup> as an amendment to the Gun Control Act of 1968, requiring background checks for firearms transfers between federally licensed firearms dealers and non-licensed persons. The Brady Act included both interim and permanent provisions.

### **Interim Provisions**

Under the interim provisions, which were in effect through November 1998, background checks were required for handgun transfers, and licensed firearms dealers were required to contact local chief law enforcement officers (CLEOs) to determine the eligibility of prospective customers to be transferred a handgun. The CLEOs were given up to five business days to make such eligibility determinations. Under the interim provisions, 12.7 million firearms background checks (for handguns) were completed during that four-year period, resulting in 312,000 denials.

---

<sup>35</sup> For further information, see CRS Report RS20957, *Internet Firearm Sales*, by T. J. Halstead.

<sup>36</sup> 107 Stat. 1536, November 30, 1993.

## Permanent Provisions

Under the Brady permanent provisions, Congress required the Attorney General to establish a national instant criminal background check system (NICS) by November 1998. In turn, the Attorney General delegated this responsibility to the FBI. Today, the FBI's Criminal Justice Information Services (CJIS) division maintains the NICS. Under the Brady permanent provisions, federally licensed firearms dealers are required to contact the FBI or state authorities, who in turn contact the FBI, to determine whether prospective customers are eligible to be transferred a handgun or long gun. The FBI and state authorities have up to three business days to make such eligibility determinations. It is notable that federal firearms laws serve as the minimum standard in the United States. States may choose, and have chosen, to regulate firearms more strictly. For example, some states require set waiting periods and/or licenses for firearms transfers and possession.

As shown in **Table 4**, under the permanent provisions of the Brady Act (December 1998 through 2009), more than 95.1 million checks were completed, resulting in more than 1.6 million denials, or nearly a 1.7% denial rate. More than 54.2 million of these checks were completed entirely by the FBI for non-point of contact (non-POC) states, the District of Columbia, and four territories. Those checks resulted in a denial rate of nearly 1.4%. Nearly 40.9 million checks were conducted by full or partial point of contact (POC) states.<sup>37</sup> Those checks resulted in a higher denial rate of 2.1%.

**Table 4. Brady Background Checks for Firearms Transfers and Permits**  
1998-2009

Year	Total Annual Checks	Denials	FBI Checks	S&L Checks	FBI Denials <sup>a</sup>	POC Denials <sup>b</sup>
1998	893,127	18,647	507,000	386,127	8,836	9,811
1999	8,621,315	204,455	4,538,000	4,083,315	81,000	123,455

Total	95,105,025	1,613,953	54,242,859	40,862,166	748,229	865,724

**Source:** U.S. Department of Justice, Office of Justice Programs, Bureau of Justice Statistics, available at <http://bjs.ojp.usdoj.gov/index.cfm?ty=pbse&sid=13>.

<sup>37</sup> Ibid.

**Notes:** On November 30, 1998, the interim provisions of the Brady Handgun Violence Prevention Act (P.L. 103-159) ended, and the permanent provisions were implemented when the FBI stood up the National Instant Criminal Background Check System (NICS).

- a. In non-point of contact (non-POC) states, federal firearms licensees contact the FBI directly to conduct NICS background checks.
- b. In point of contact (POC) states, federal firearms licenses contact a state agency and, in turn, the state agency contacts the FBI to conduct NICS background checks.

## **POC and Non-POC States**

Although the FBI handles background checks entirely for some states, other states serve as full or partial points of contact (POCs) where federal firearms licensees contact a state agency, and the state agency contacts the FBI for such checks. In 14 states, state agencies serve as full POCs and conduct background checks for both long gun and handgun transfers. In four states, state agencies serve as partial POCs for handgun permits, whereas in another four states state agencies serve as partial POCs for handgun transfers only. In these eight partial POC states, checks for long gun transfers are conducted entirely through the FBI. In the 28 non-POC states, the District of Columbia, and four territories (Guam, Northern Mariana Islands, Puerto Rico, and the Virgin Islands), federal firearms licensees contact the FBI directly to conduct background checks through NICS for both handgun and long gun checks.

For state agencies (POCs), background checks may not be as expeditious, but they may be more thorough because state agencies may have greater access to databases and records that are not available through NICS. According to the Government Accountability Office (GAO), this is particularly true for domestic violence misdemeanor offenses and protective orders.<sup>38</sup>

## **Background Check Fee and Record Retention**

Beginning in FY1999, Congress has prohibited the collection of any fee for firearms-related background checks made through the FBI-administered NICS in DOJ appropriations.<sup>39</sup> Beginning in FY2004, that provision also included language to require the next-day destruction of approved background check records. The issue of approved Brady background check record retention has been contentious since the inception of the FBI-administered NICS, because a provision in the Brady Act (§ 103(i)) prohibits the establishment of any electronic registry of firearms, firearms owners, or approved firearms transactions and dispositions.

Nevertheless, under Attorney General Janet Reno DOJ proposed a rule on October 30, 1998, that would have allowed such records to be maintained for up to six months for audit purposes.<sup>40</sup> The NRA challenged this proposed rule in federal court, arguing that retaining the approved records was tantamount to a temporary registry. On July 11, 2000, the United States Court of Appeals for the District of Columbia found that nothing in the Brady Act prohibited the temporary retention

---

<sup>38</sup> For further information, see GAO, *Gun Control: Opportunities to Close Loopholes in the National Instant Criminal Background Check System*, GAO-02-720, July 2002, p. 27.

<sup>39</sup> In the 110<sup>th</sup> Congress, the House-passed H.R. 2640 and Senate-reported S. 2084 include provisions that would permanently codify the NICS fee prohibition (see discussion of the NICS Improvement Amendments Act of 2007 above). For FY2008, such a prohibition is also included on an annual basis in the House-passed and Senate-reported CJS appropriations bills (H.R. 3093/S. 1745).

<sup>40</sup> 63 *Federal Register* 58303.

of information about lawful firearms transfers for certain audit purposes.<sup>41</sup> On January 22, 2001, DOJ promulgated a final rule that allowed such records to be maintained for up to 90 days.<sup>42</sup> Attorney General John Ashcroft opposed this rule, however, and DOJ proposed another rule on July 6, 2001, that called for the next-day destruction of those files.<sup>43</sup>

In July 2002, meanwhile, GAO reported that under Attorney General Reno, the FBI had conducted “non-routine” searches of the NICS audit log for law enforcement agencies to determine whether a person, whom subsequent information showed was a prohibited person, had been transferred a firearm within the previous 90 days. The FBI informed GAO that such searches were routinely conducted but were a “secondary benefit” given that the audit log was maintained primarily to check for system “accuracy, privacy, and performance.” In addition, GAO reported that the next-day destruction of records would “adversely affect” other NICS operations, including firearms-retrieval actions, NICS audit log checks for previous background checks, verifications of NICS determinations for federal firearms licensees, and ATF inspections of federal firearms licensees’ record keeping.<sup>44</sup>

Despite those adverse affects, opponents of greater federal gun control viewed the non-routine use of NICS records as being beyond the scope of authority given to the Attorney General under the Brady Act. GAO reported that DOJ took steps to minimize the adverse affects of the next-day destruction of those records. In the wake of the September 11, 2001, terrorist attacks, additional issues regarding Brady background checks emerged (as described below).

## Tucson Shootings

Following the tragic shootings in Tucson, AZ, on January 8, 2011, the 112<sup>th</sup> Congress could possibly examine issues related to the shooter’s mental illness and drug use, as well as his use of large capacity ammunition feeding devices (LCAFDs). Representative Gabrielle Giffords was severely wounded in this attack. Another issue that could receive attention is banning firearms within the proximity of certain high-level federal officials.

## Mental Illness and Drug Use as Prohibiting Factors

As described above, persons who have been “adjudicated mental defective,”<sup>45</sup> or who are “unlawful users of or addicted to any controlled substance,”<sup>46</sup> are prohibited from possessing a

---

<sup>41</sup> *NRA v. Reno* (No. 99-5270, 216 F. 3d 122; 2000 U.S. App. Lexis 15906).

<sup>42</sup> 66 *Federal Register* 6470.

<sup>43</sup> 66 *Federal Register* 35567.

<sup>44</sup> For further information on these issues, see GAO, *Gun Control: Potential Effects of Next-Day Destruction of NICS Background Check Records*, GAO-02-653, July 2002.

<sup>45</sup> For a definition of “adjudicated mental defective,” see footnote 79.

<sup>46</sup> Under 27 C.F.R. § 478.11, an “unlawful user of or addicted to any controlled substance” means a person who uses a controlled substance and has lost the power of self-control with reference to the use of [a] controlled substance; and any person who is a current user of a controlled substance in a manner other than as prescribed by a licensed physician. Such use is not limited to the use of drugs on a particular day, or within a matter of days or weeks before, but rather that the unlawful use has occurred recently enough to indicate that the individual is actively engaged in such conduct. A person may be an unlawful current user of a controlled substance even though the substance is not being used at the precise time the person seeks to acquire a firearm or receives or possesses a firearm. An inference of current use may (continued...)

firearm or having one transferred to them. The FBI maintains files on those persons as part of the NICS Index. According to the FBI, as of December 31, 2010, the NICS Index included 1,107,758 records on individuals who had been adjudicated mental defective.<sup>47</sup> In sharp contrast, the NICS Index included 2,092 records on individuals who are known to be drug users and addicts.<sup>48</sup> As described below, following the Virginia Tech mass shooting on April 16, 2007, Congress passed the NICS Improvement Amendments Act of 2007 (NIAA; P.L. 110-180), a law that established incentives to prompt state, local, and tribal governments to transfer mental defective files to the FBI for inclusion in the NICS Index. Although this act focused on mentally ill persons who were adjudicated to be a threat to themselves or others, it did not focus on drug users. As a consequence, Congress could revisit the NIAA to increase incentives for state, local, and tribal governments to transfer records on both categories of prohibited persons. Representatives Carolyn McCarthy and John Dingell have reportedly submitted a request to the Government Accountability Office (GAO) for an assessment of weaknesses in firearms-related background check procedures.<sup>49</sup>

## Large Capacity Ammunition Feeding Devices

The Tucson shooter was reportedly armed with a 9mm Glock 19 semiautomatic pistol loaded with 31 rounds in a 33-round extended magazine.<sup>50</sup> This pistol is normally equipped with a 15-round magazine, two of which the shooter also had on his person. He also had another 33-round extended magazine.<sup>51</sup> He managed to fire at least 31 shots, emptying a single magazine. He killed six people and wounded another 13, including Representative Giffords. Three bystanders, one of whom was wounded, managed to subdue the shooter as he attempted to reload his second 30-plus round magazine. Representative McCarthy has introduced a bill to reinstate a ban on magazines that are capable of accommodating more than 10 rounds (H.R. 308). Such a ban was in effect from September 13, 1994, through September 13, 2004, as part of the larger semiautomatic assault weapons ban (described below). Senator Frank Lautenberg has introduced a similar bill (S. 32).

---

(...continued)

be drawn from evidence of a recent use or possession of a controlled substance or a pattern of use or possession that reasonably covers the present time, e.g., a conviction for use or possession of a controlled substance within the past year; multiple arrests for such offenses within the past 5 years if the most recent arrest occurred within the past year; or persons found through a drug test to use a controlled substance unlawfully, provided that the test was administered within the past year. For a current or former member of the Armed Forces, an inference of current use may be drawn from recent disciplinary or other administrative action based on confirmed drug use, e.g., court-martial conviction, nonjudicial punishment, or an administrative discharge based on drug use or drug rehabilitation failure.

<sup>47</sup> See <http://www.fbi.gov/about-us/cjis/nics/reports/nics-index>.

<sup>48</sup> Ibid.

<sup>50</sup> David A. Fahrenthold and Clarence Williams, "Congresswoman Shot in Tucson Rampage," *Washington Post*, January 9, 2011, p. A1.

<sup>51</sup> Most semiautomatic pistol magazines, or clips, are designed to self-contained within the handle of the pistol. The 33 round extended magazines used by the shooter protrude well beneath the butt of the pistol handle.

## **Banning Firearms within the Proximity of Federal Officials**

Representative Peter King has introduced a bill (H.R. 496) that would prohibit most people from carrying a firearm within 1,000 feet of certain high-level federal officials while those officials were holding a public event, campaigning for office, or otherwise acting in an official capacity. This bill arguably is modeled on the Gun Free School Zone Act of 1990 (P.L. 101-647), which prohibits firearm possession in a school zone (on the campus of a public or private school or within 1,000 feet of the grounds).<sup>52</sup>

## **Legislative Action in the 111<sup>th</sup> and 110<sup>th</sup> Congresses**

In the 111<sup>th</sup> Congress, congressional debate regarding the efficacy of gun control was colored by the Supreme Court decisions regarding the lawful possession of firearms for self-defense. Pro-gun Members of Congress were successful in sponsoring several firearms-related provisions that were either reported out of full committee or passed. While some of these provisions were enacted, others were not. These issues may re-emerge in the 112<sup>th</sup> Congress, just as the 111<sup>th</sup> Congress revisited several issues previously considered in the 110<sup>th</sup> Congress.

## **Constitutionality of DC Handgun Ban and Related Legislation**

On June 26, 2008, the Supreme Court issued its decision in *District of Columbia v. Heller* on the constitutionality of a DC law that banned handguns for 32 years, among other things. Passed by the DC Council on June 26, 1976, the DC handgun ban required that all firearms within the District be registered and all owners be licensed, and it prohibited the registration of handguns after September 24, 1976. In a 5-4 decision, the Supreme Court found the handgun ban to be unconstitutional because it violated an individual's right under the Second Amendment to possess a handgun in his home for lawful purposes such as self-defense.<sup>53</sup>

## **DC Council Passes Emergency Law**

On July 15, 2008, the DC Council passed a temporary, emergency law that allowed residents through a registration/certificate process to keep a handgun in their home as long as that firearm had a capacity of fewer than 12 rounds of ammunition and was not loadable from a magazine in the handgrip, which in effect limited legal handguns under the temporary law to revolvers as opposed to semiautomatic pistols. The emergency law also continued to require that handguns be kept unloaded and disassembled, or trigger locked, unless an attack in a home was imminent or underway. Pro-gun groups immediately criticized the council's emergency law for not being in the "spirit" of the Supreme Court's decision because it continued to ban semiautomatic pistols and did not fully roll back the trigger lock requirement. Since the initial emergency law was passed, the DC Council has passed several other pieces of similar temporary, emergency laws related to the *Heller* decision. These laws include new firearms-related provisions that were also included in permanent legislation passed by the DC Council that is described below.

<sup>52</sup> For the statutory definition of a "school zone," see 18 U.S.C. § 921(a)(25). For the prohibition, see 18 U.S.C. § 922(q).

<sup>53</sup> For legal analysis, see CRS Report R40137, *District of Columbia v. Heller: The Supreme Court and the Second Amendment*, by Vivian S. Chu.

## Legislation Related to DC Gun Laws<sup>54</sup>

Several pro-gun Members of Congress were dissatisfied with the DC Council's temporary law. On July 24, 2008, Representative Mike Ross filed a motion to discharge the Rules Committee from consideration of H.Res. 1331, a resolution that would have provided for the consideration of a bill to restore Second Amendment rights in the District of Columbia (H.R. 1399).<sup>55</sup> This bill was similar to previous bills introduced by Representative Mark Souder and Senators Kay Bailey Hutchison and Orrin Hatch in previous congresses. Representative Ross introduced H.R. 1399 in the 110<sup>th</sup> Congress for himself and Representative Souder on March 27, 2007, and Senator Hutchison introduced a companion measure (S. 1001) on March 28, 2007.

In the 110<sup>th</sup> Congress, Representative Travis Childers introduced a similar bill (H.R. 6691) on July 31, 2008. All three bills would have amended the DC Code to

- limit the Council's authority to regulate firearms;
- remove semiautomatic firearms that can fire more than 12 rounds without manually reloading from the definition of "machine gun";
- amend the registration requirements so that they do not apply to handguns, but only to sawed-off shotguns, machine guns, and short-barreled rifles;
- remove restrictions on ammunition possession;
- repeal requirements that DC residents keep firearms in their possession unloaded and disassembled, or bound by a trigger lock;
- repeal firearms registration requirements generally; and
- repeal certain criminal penalties for possessing or carrying unregistered firearms.

Representatives John Dingell, John Tanner, and Mike Ross reportedly negotiated an agreement with the House leadership to consider H.R. 6691 in early September.<sup>56</sup> H.R. 6691 included language that stated as a congressional finding that DC officials "have indicated their intention to continue to unduly restrict lawful firearm possession and use by citizens of the District." H.R. 6691 also included a provision that would have allowed DC residents to purchase firearms from federally licensed gun dealers in Virginia and Maryland.

On September 9, 2008, the House Oversight and Government Reform Committee held a hearing on the possible effects H.R. 6691 might have on the District. On the same day, Representative Eleanor Holmes Norton introduced H.R. 6842, a bill that would have required the DC mayor and Council to ensure that regulations were promulgated that would have been consistent with the

---

<sup>54</sup> Foreshadowing the contentiousness of the DC gun ban issue, Representative Lamar Smith had previously scuttled the District of Columbia House Voting Rights Act of 2007 (H.R. 1433) on March 22, 2007, when he offered a motion to recommit the bill to the House Oversight and Government Reform Committee for consideration of an amendment to repeal portions of the DC handgun ban. Rather than vote on the motion, debate on H.R. 1433 was postponed indefinitely. Jonathan Allen, "Gun-Rights Gambit Sidetracks D.C. House Vote," *CQ Today*, March 22, 2007; and for further information on H.R. 1433, see CRS Report RL33830, *District of Columbia Voting Representation in Congress: An Analysis of Legislative Proposals*, by Eugene Boyd.

<sup>55</sup> Under the Home Rule Act (P.L. 93-198), Congress has reserved for itself the authority to legislate for the District.

<sup>56</sup> Keith Perine and Seth Stern, "House Democrats Plan Vote To Roll Back D.C. Gun Laws," *CQ Today Online News*, August 5, 2008.

*Heller* decision. On September 15, 2008, the House Oversight and Government Reform Committee reported H.R. 6842 (H.Rept. 110-843). On September 17, 2008, however, the House amended H.R. 6842 with the text of H.R. 6691 and passed the Childers' bill.

## **DC Council Passes Permanent Legislation**

On December 16, 2008, the DC Council passed the Firearms Control Amendment Act of 2008 (FCAA; B17-0843) and the Inoperable Pistol Amendment Act of 2008 (IPAA; B17-0593).<sup>57</sup> Mayor Adrian Fenty signed the FCAA into law on January 28, 2009 (L17-0372). This bill was transmitted to Congress on February 10, 2009. From the day of transmittal, Congress had 30 legislative days to review this bill under the DC Home Rule Act (according to the District of Columbia). Among other things, this law amends the DC Code to

- adopt the federal definition of “machine gun,” which does not include semiautomatic pistols;
- prohibit the possession and registration of “assault weapons” and rifles capable of firing .50 caliber Browning Machine Gun (BMG) rounds; and
- require that all firearms made after January 1, 2011, be microstamped.<sup>58</sup>

Many provisions of this law, including the assault weapons ban and the microstamping provisions, were modeled after California state law.

Mayor Fenty signed IPAA into law on January 16, 2009 (L17-0388). It was transmitted to Congress on February 4, 2009. Because the bill includes penalty provisions, Congress had 60 legislative days to review this bill under the DC Home Rule Act. Among other things, this permanent legislation amends the DC Code to

- criminalize the possession of inoperable firearms;
- criminalize the discharge of firearms;
- prohibit carrying a rifle or shotgun;
- allow for the transportation of firearms under the same conditions as permitted under federal law; and
- change the waiting period to purchase a firearm from 48 hours to 10 days.

## **DC Voting Rights and Gun Laws in the 111<sup>th</sup> Congress**

On February 26, 2009, Senator John Ensign successfully amended (S.Amdt. 576) the District of Columbia House Voting Rights Act of 2009 (S. 160) by a yea-nay vote of 62-36 (Record Vote Number 72) with language that would have overturned certain DC guns laws and prevent the District from legislating in these areas in the future. The Senate passed this bill on the same day

---

<sup>57</sup> For further information on these bills, as well as the Ensign amendment, see CRS Report R40474, *D.C. Gun Laws and Proposed Amendments*, by Vivian S. Chu.

<sup>58</sup> Microstamping is an emerging technology by which a firearm's serial number is engraved microscopically with a laser onto the breech face or firing pin of a firearm. When the firearm is fired, the serial number is “stamped” upon the cartridge casing. If a microstamped cartridge is subsequently recovered at a crime scene, the firearm's serial number could potentially yield additional leads for law enforcement.

by a yea-nay vote of 61-37 (Record Vote Number 73).<sup>59</sup> This bill was tabled while the House leadership attempted to negotiate an end to the impasse over the DC gun laws and bring its version of the DC voting rights bill (H.R. 157) to the floor.<sup>60</sup> In April 2010, efforts were made to revive the voting rights bill, but pro-gun Members prepared amendments to overturn the city's gun laws. Consequently, Members managing the DC voting rights bill postponed further consideration rather than risk passage of amendments that would overturn the city's gun laws.<sup>61</sup> Senator John McCain and Representative Travis Childers introduced their pro-gun amendments as stand-alone bills, the Second Amendment Enforcement Act (S. 3265/H.R. 5162).

## **Constitutionality of the Chicago Handgun Ban**

On June 28, 2010, the Supreme Court issued its 5-4 decision in *McDonald v. City of Chicago* and found that the individual right to lawfully possess a firearm for the purposes of self-defense under the Second Amendment applied to the states by way of the Fourteenth Amendment.<sup>62</sup> Although the *McDonald* decision arguably nullified the Chicago handgun ban by limiting a state, city, or local government's ability to prohibit handguns outright, it does not delineate what would constitute permissible gun control laws under the Second Amendment. Indeed, the Supreme Court remanded the Chicago handgun ban back to the Seventh Circuit Court of Appeals for a rehearing. Consequently, the delineation of permissible gun laws will likely be developed in future cases. Nevertheless, the City of Chicago has reportedly adopted handgun regulations that are similar to those adopted by the District of Columbia. These regulations allow eligible residents to register one operable handgun per household, but in most cases that handgun must be locked and rendered inoperable, and it cannot be carried outside of the home.<sup>63</sup>

## **Public Lands and Firearms Possession and Use**

In the 111<sup>th</sup> Congress, Senator Tom Coburn successfully amended the Credit CARD Act of 2009 (H.R. 627) with a provision (S.Amdt. 1067) that allows private persons to carry firearms in national parks and wildlife refuges (effective February 22, 2010). This amendment passed by a vote of 67 to 29 (Record Vote Number 188) on May 12, 2009. Under H.Res. 456, the House voted on the Coburn amendment as a separate measure and passed it by a vote of 279 to 147. President Barack Obama signed H.R. 627 into law on May 22, 2009 (P.L. 111-24).

Previously, in the 110<sup>th</sup> Congress during consideration of a public land bill (S. 2483), Senator Coburn offered but later withdrew an amendment (S.Amdt. 3967) that would have overturned federal regulations that prohibit visitors to parks and wildlife refuges managed by the National Park Service (NPS)<sup>64</sup> and Fish and Wildlife Service (FWS)<sup>65</sup> from possessing operable and loaded

<sup>64</sup> 36 C.F.R. Part 2.

<sup>65</sup> 50 C.F.R. Part 27.

firearms. While these regulations were last revised substantively in 1981 and 1983, similar firearms restrictions were promulgated in the 1930s in an effort to curb poaching and other illegal activities. There are exceptions for hunting and marksmanship under current law. Since the 1980s, however, many states have passed laws that allow persons to carry concealed handguns for personal protection. Although 48 states have “concealed carry” laws, only 24 of those states reportedly allow concealed handguns to be carried in state parks.<sup>66</sup>

On April 30, 2008, in part at the urging of pro-gun Members of Congress, the Department of the Interior (DOI) published proposed regulations that would authorize the possession of loaded and concealed firearms, as long as carrying those firearms in that fashion would be legal under the laws of the states where the public lands are located.<sup>67</sup> While the initial comment period was scheduled to end on June 30, 2008, it was extended until August 8, 2008.<sup>68</sup> DOI reported receiving approximately 90,000 comments on those proposed regulations. Final regulations were issued on December 10, 2008.<sup>69</sup> Those regulations took effect on January 9, 2009. However, on March 19, a U.S. District Judge issued a preliminary injunction on the regulations in a lawsuit brought by three groups: the Brady Campaign to Prevent Gun Violence, the National Parks Conservation Association, and the Coalition of National Park Service Retirees.<sup>70</sup> On March 20, the NRA filed a notice to appeal in Federal District Court in opposition to the preliminary injunction.

Senator Coburn also introduced a bill, the Protecting Americans from Violent Crime Act of 2008 (S. 2619), that was very similar to his proposed amendment and DOI’s proposed regulations. Supporters of those proposals pointed to a reported rise in illegal activities and violent crime on public lands. Opponents argued that the risk of a violent crime encounter in National Parks and Wildlife Refuges was negligible.<sup>71</sup> They further argued that allowing others to carry loaded and concealed handguns on their person would make them less safe. In the 111<sup>th</sup> Congress, similar measures were introduced by Representative Doc Hastings and Senator Mike Crapo (H.R. 1684/S. 816).

## **Amtrak Passengers and Firearms**

On September 16, 2010, Senator Roger Wicker amended the FY2010 Transportation-HUD Appropriations bill (H.R. 3288) with language to authorize private persons to carry firearms and ammunition in their checked luggage on Amtrak trains. The Wicker amendment (S.Amdt. 2366) passed by a yea-nay vote, 68-30 (Record Vote Number 279). On September 17, 2009, the Senate passed this bill. Later, H.R. 3288 became the vehicle for the Consolidated Appropriations Act, 2010. Conferees retained the Wicker language in the conference agreement (H.Rept. 111-366),

<sup>70</sup> Juliet Eilperin and Del Quentin Wilber, “Judge Blocks Rule Permitting Concealed Guns in U.S. Parks,” *Washington Post*, March 20, 2009, p. A09.

<sup>71</sup> CRS compilation of *FBI Uniform Crime Reports* data show that from 2002 through 2006, there were 15 murders and non-negligent homicides reported by the FWS and 48 reported by the NPS. However, FWS reports all crimes encountered by its agents, whether or not they occurred on refuge land. It is difficult to determine how many of the 15 murders occurred on refuges.

and the President signed H.R. 3288 into law (P.L. 111-117) on December 16, 2009. Section 159 of the act requires Amtrak, with the Transportation Security Administration, to report to Congress (within six months of enactment—June 16, 2010) on proposed guidance and procedures to implement a “checked firearms program.” The reported guidance and procedures are to be implemented within one year of enactment. The act further requires that checked firearms be placed in a locked, hard-sided container, and that passengers planning to carry firearms in their luggage declare their intentions to Amtrak at the time they make their reservations or within 24 hours of departure. Similar requirements are set out for placing ammunition in checked luggage.

## **Law Enforcement Officers Safety Act Amendments**

The 111<sup>th</sup> Congress passed amendments to clarify and expand eligibility under the Law Enforcement Officers Safety Act (LEOSA; P.L. 108-277). This law authorizes certain qualified active-duty and retired law enforcement officers to carry concealed firearms across state lines, while off duty. Senator Leahy, the Judiciary Committee Chair, introduced the amendments as a stand-alone bill (S. 1132). In the House, Representative J. Randy Forbes introduced a similar measure (H.R. 3752). The Senate Judiciary Committee approved S. 1132 on March 11, 2010, and the Senate passed the bill on May 13, 2010. The Senate Judiciary Committee filed a report on this bill on July 27, 2010 (S.Rept. 111-233). The House passed S. 1132 on September 29, 2010. The President signed S. 1132 into law on October 12, 2010 (P.L. 111-272). The 2010 LEOSA amendments (1) clarify that certain Amtrak and executive branch law enforcement officers are eligible for concealed carry privileges under P.L. 108-277, (2) reduce the length of service criterion for eligibility under that law from 15 to 10 years, and (3) clarify other provisions of the law related to certification and credentialing.

Previously, in the 110<sup>th</sup> Congress, the Senate Judiciary Committee reported a similar bill (S. 376; S.Rept. 110-150) on September 5, 2007. This bill was also introduced by Senator Leahy. Representative Forbes introduced a similar bill (H.R. 2726). The language of S. 376 was incorporated into S. 2084, the School Safety and Law Enforcement Improvement Act of 2007, when that bill was reported on September 21, 2007 (S.Rept. 110-183). In the 109<sup>th</sup> Congress, the Senate amended H.R. 1751, the Court Security Improvement Act of 2006, with similar LEOSA provisions and passed that measure.

## **Patient Protection and Affordable Care Act and Firearms**

The 111<sup>th</sup> Congress included language in the Patient Protection and Affordable Healthcare Act (PPACA; P.L. 111-148) that prohibits data collection on gun ownership or higher premiums for gun owners under wellness program provisions. The catalyst for this language was an “action alert” that Gun Owners of America (GOA) sent out, urging its membership to oppose a Senate health care reform proposal released on November 18, 2009. The GOA argued that the Senate proposal, along with other enacted provisions of law, would have required doctors to provide “gun-related health data” to a computerized national health information network.<sup>72</sup> With such information, the GOA maintained that the federal government would deny individuals the ability to obtain a firearm or firearms permit. Of particular concern for the GOA were mental health records. Another concern raised by the GOA was the possibility that insurance providers under

---

<sup>72</sup> Shalaigh Murray, “Public Option at Center of Debate; Democratic Dissent Reid Must Find Compromise to Pass Health-Care Bill,” *Washington Post*, November 23, 2009, p. A01.

the Senate proposal would have been required or prompted to raise premiums for persons who exhibited arguably “unhealthy behaviors,” such as firearms ownership.

Although the Senate proposal included provisions to amend the Health Insurance Portability and Accountability Act (HIPAA) that addressed electronic data transaction standards for national health information sharing purposes to facilitate eligibility determinations and health care plan enrollments, it did not include any provisions that would have directly required the national collection of “gun-related health data.” Without a clear directive, it is debatable whether the Department of Health and Human Services (HHS) would have undertaken such data collection on firearms ownership and possession given other provisions in current law, albeit in different statutory contexts, that prohibit the establishment of a registry of privately held firearms or firearms owners.<sup>73</sup> Dr. David Blumenthal, the National Coordinator for Health Information Technology at HHS, said that the current system does not include a database into which such information could be fed, nor are there plans to create one.<sup>74</sup> Blumenthal added that “we don’t want to do it and it’s not authorized.”<sup>75</sup>

Nor did the Senate proposal include any provisions that would have required or prompted insurance providers to raise premiums on gun owners. On the other hand, the Senate legislation did include provisions that would have codified and amended HIPAA wellness program provisions that would have addressed employer-based incentives for healthy behavior to reduce health care costs. Arguably, these provisions would not have precluded the Secretary of Health and Human Services from promulgating regulations that addressed risks associated with firearms ownership, possession, use, and storage. However, such regulations, if proposed, would have likely been tested in administrative and judicial review as to their impact on Second Amendment rights. Nonetheless, Senate legislators included new language in their Patient Protection and Affordable Care proposal, which the Senate passed as an amendment to H.R. 3590 on December 24, 2009.<sup>76</sup>

The Senate language, which was included in P.L. 111-148, prohibits any wellness and health promotion activity sponsored under the act’s HIPAA amendments from requiring the disclosure or collection of any information about the presence or storage of a lawfully possessed firearm or ammunition in the residence or on the property of an individual, or the lawful use, possession, or storage of a firearm or ammunition by an individual. The language also states that nothing in the bill would be construed to authorize any data collection on the lawful ownership, possession, use, or storage of firearms or ammunition, or to maintain records on individual ownership or possession of a firearm or ammunition. In addition, with regard to any health insurance to be provided under the act, this provision prohibits providers from increasing premium rates; denying coverage; or reducing or withholding discounts, rebates, or rewards for participation in a wellness program because of an individual’s lawful ownership, possession, use, or storage of a firearm or ammunition. Finally, under the data collection activities authorized under the act, the language

---

<sup>73</sup> In the Brady Handgun Violence Prevention Act (P.L. 103-159, November 30, 1993, 107 Stat. 1542), Congress included a provision (§ 103(i)) that prohibits any department, agency, officer, or employee of the United States from establishing a registration system with respect to firearms, firearms owners, or firearms transactions/dispositions that would use records generated by the National Instant Criminal Background Check System (NICS).

<sup>74</sup> Peter Overby, “A Vote For Health Care, A Vote Against Gun Rights?,” *National Public Radio*, November 25, 2009.

<sup>75</sup> *Ibid.*

<sup>76</sup> See proposed section 2717 as included in section 1001 and amended by section 10101 in the Senate-passed H.R. 3590.

states that no individual would be required to disclose any information relating to the lawful ownership, possession, use, or storage of a firearm or ammunition.

## **NICS Improvement Amendments Act of 2007<sup>77</sup>**

In the wake of the Virginia Tech tragedy,<sup>78</sup> the 110<sup>th</sup> Congress passed legislation to improve firearms-related background checks. The Senate amended and passed the NICS Improvement Amendments Act of 2007 (H.R. 2640) following lengthy negotiations, as did the House, on December 19, 2007, clearing that bill for the President's signature. President Bush signed the bill into law on January 8, 2008 (P.L. 110-180). The enacted NICS amendments

- strengthen a provision in the Brady Handgun Violence Prevention Act (P.L. 103-159) that requires federal agencies to provide, and the Attorney General to secure, any government records with information relevant to determining the eligibility of a person to receive a firearm;
- require states, as a condition of federal assistance, to make available to the Attorney General certain records that would disqualify persons from acquiring a firearm for inclusion in the FBI-administered National Instant Criminal Background Check System (NICS), particularly those records related to convictions for misdemeanor crimes of domestic violence and persons adjudicated as mentally defective;<sup>79</sup>
- require states, as a condition of federal assistance, as well as federal agencies like the Department of Veterans' Affairs (VA) to establish administrative relief procedures under which a person who has been adjudicated as a mental defective could apply to have his firearms possession and transfer eligibility restored;<sup>80</sup>
- authorize additional appropriations for grant programs to help states, courts, and local governments establish or improve automated record systems; and
- prohibit the FBI from collecting any fees for such background checks.

H.R. 2640 was introduced by Representative Carolyn McCarthy and co-sponsored by Representative John Dingell. As passed by the House by a voice vote on June 13, 2007, H.R. 2640 reportedly reflected a compromise between groups favoring and opposing greater gun

---

<sup>77</sup> As described in greater detail above, the National Instant Criminal Background Check System (NICS) is administered by the FBI, so that federally licensed gun dealers can process a background check to determine a customer's eligibility to possess a firearm before proceeding with a transaction.

<sup>78</sup> On April 16, 2007, a student at Virginia Polytechnic Institute and State University shot 32 people to death and wounded many others.

<sup>79</sup> Under 27 C.F.R. 478.11, the term "adjudicated as a mental defective" includes a determination by a court, board, commission, or other lawful authority that a person, as a result of marked subnormal intelligence or mental illness, incompetency, condition, or disease (1) is a danger to himself or others, or (2) lacks the mental capacity to manage his own affairs. The term also includes (1) a finding of insanity by a court in a criminal case and (2) those persons found incompetent to stand trial or found not guilty by reason of lack of mental responsibility pursuant to articles 50a and 72b of the Uniform Code of Military Justice, 10 U.S.C. § 850a, 876(b).

<sup>80</sup> Federal law authorizes the Attorney General to consider applications from prohibited persons for relief from disqualification (18 U.S.C. §925(c)). Since FY1993, however, Congress has attached an appropriations rider on the ATF salaries and expenses account that prohibits the expenditure of any funding under that account to process such applications.

control.<sup>81</sup> The Senate Judiciary Committee approved similar, but not identical, NICS improvement amendments as part of the School Safety and Law Enforcement Improvement Act of 2004 on August 2, 2007, and reported this bill on September 21, 2007 (S. 2084; S.Rept. 110-183).

The Senate Judiciary Committee included five other measures in S. 2084. With some modification, those measures included the School Safety Improvements Act (S. 1217), the Equity in Law Enforcement Act (S. 1448), the PRECAUTION Act (S. 1521), the Terrorist Hoax Improvements Act (S. 735), and the Law Enforcement Officers Safety Act of 2007 (LEOSA; S. 376). Support for the NICS improvement and the LEOSA amendments (described below) in S. 2084 was reportedly divided and uneven, however.<sup>82</sup> Citing privacy and cost issues related to the NICS amendments, Senator Coburn reportedly placed a hold on that legislation.<sup>83</sup>

In addition, some opposition to NICS improvement amendments had coalesced around an assertion made by Larry Pratt of Gun Owners of America that, under these amendments, any veteran who was or had been diagnosed with Posttraumatic Stress Disorder (PTSD)<sup>84</sup> and was found to be a “danger to himself or others would have his gun rights taken away ... forever.”<sup>85</sup> Under current law, however, any veteran or other VA beneficiary who is adjudicated or determined to be a mental defective, because he poses a danger to himself or others, or is incapable of conducting his day-to-day affairs, is ineligible to possess a firearm. A diagnosis of PTSD in and of itself is not a disqualifying factor for the purposes of gun control under the NICS improvement amendments or previous law. Under the enacted NICS improvement amendments, VA beneficiaries who have been determined to be mental defectives could appeal for administrative relief and possibly have their gun rights restored if they could demonstrate that they were no longer afflicted by a disqualifying condition.

## **Veterans, Mental Incompetency, and Firearms Eligibility**

In the 110<sup>th</sup> Congress, Senator Burr successfully amended the Veterans’ Medical Personnel Recruitment and Retention Act of 2008 (S. 2969) in full committee markup on June 26, 2008. The language of the Burr amendment would have provided that “a veteran, surviving spouse, or child who is mentally incapacitated, deemed mentally incompetent, or experiencing an extended loss of consciousness shall not be considered adjudicated as a mental defective” for purposes of the Gun Control Act, “without the order or finding of a judge, magistrate, or other judicial authority of competent jurisdiction that such veteran, surviving spouse, or child is a danger to him

<sup>84</sup> PTSD is an anxiety disorder that can occur after one has been through a traumatic event. Symptoms may manifest soon after the trauma, or may be delayed. For further information, see U.S. Department of Veterans’ Affairs, National Center for Posttraumatic Stress Disorder, Fact Sheet, available at [http://www.ncptsd.va.gov/ncmain/ncdocs/fact\\_shts/fs\\_what\\_is\\_ptsd.html](http://www.ncptsd.va.gov/ncmain/ncdocs/fact_shts/fs_what_is_ptsd.html).

<sup>85</sup> Larry Pratt, “Veterans Disarmament Act To Bar Vets From Owning Guns,” September 23, 2007, available at <http://www.prisonplanet.com/articles/september2007/230907Disarmament.htm>.

or herself or others.” Senator Burr introduced a bill, the Veterans’ 2<sup>nd</sup> Amendment Protection Act (S. 3167), that would have achieved the same ends as his amendment to S. 2969.

In the 111<sup>th</sup> Congress, Senator Burr reintroduced his bill as S. 669, and the Senate Committee on Veterans’ Affairs reported this bill (S.Rept. 111-27) on June 16, 2009. Representative Jerry Moran introduced a similar bill (H.R. 2547). The House Veterans’ Affairs Committee considered and approved a similar provision that Representative John Boozman offered as an amendment to a draft bill in full committee markup on September 15, 2010. This provision was included in the reported version of the bill (H.R. 6132; H.Rept. 111-630). However, when the House considered H.R. 6132 under suspension of the rules, an amended version of H.R. 6132 was called up that did not include the Boozman provision.

### **Mental Defective Adjudications**

Under 27 C.F.R. § 478.11, the term “adjudicated as a mental defective” includes a determination by a court, board, commission, or other lawful authority that a person, as a result of marked subnormal intelligence or a mental illness, incompetency, condition, or disease, (1) is a danger to himself or others, or (2) lacks the mental capacity to manage his own affairs. The term also includes (1) a finding of insanity by a court in a criminal case and (2) those persons found incompetent to stand trial or found not guilty by reason of lack of mental responsibility pursuant to articles 50a and 72b of the Uniform Code of Military Justice, 10 U.S.C. §§ 850a, 876(b).

This definition of “mental defective” was promulgated by the ATF in a final rule published on June 27, 1997.<sup>86</sup> In the final rule, the ATF noted that the VA had commented on the “proposed rulemaking” and had correctly interpreted that “adjudicated as a mental defective” includes a person who is found to be “mentally incompetent” by the Veterans’ Benefit Administration (VBA). Under veterans law, an individual is considered “mentally incompetent” if he or she lacks the mental capacity to contract or manage his or her own affairs for reasons related to injury or disease (under 38 CFR § 3.353).<sup>87</sup> In a proposed rulemaking, the ATF opined that the inclusion of “mentally incompetent” in the definition of “mental defective” was wholly consistent with the legislative history of the 1968 Gun Control Act.<sup>88</sup> Reportedly, the VA could have been the only federal agency that had promulgated a definition like “mentally incompetent” that overlapped with the term “mental defective.”<sup>89</sup>

### **VA Referrals to the FBI**

In November 1998, the VBA provided the FBI with disqualifying records on 88,898 VA beneficiaries, whom VA rating specialists had determined to be “mentally incompetent” based on medical evidence that they were incapable of managing their own affairs.<sup>90</sup> Thus, a fiduciary (or designated payee) was appointed for them. During the determination process, beneficiaries were notified that the VA was proposing to rate them “mentally incompetent,” and they were able to

---

<sup>86</sup> *Federal Register*, vol. 62, no. 124, June 27, 1997, p. 34634.

<sup>87</sup> *Federal Register*, vol. 61, no. 174, September 6, 1996, p. 47095.

<sup>88</sup> *Ibid.*

<sup>89</sup> Personal communication with Compensation and Pension Program staff, Department of Veterans’ Affairs, July 9, 2008.

<sup>90</sup> *Ibid.*

submit evidence to the contrary if they wished.<sup>91</sup> This determination process is still followed today at the VA.<sup>92</sup>

The Veterans' Medical Administration has not submitted any disqualifying records on VA beneficiaries to the FBI for inclusion in NICS for any medical/psychiatric reason (like PTSD), unless those veterans had been involuntarily committed under a state court order to a VA medical facility because they posed a danger to themselves or others. In those cases, the state in which the court resides would submit the disqualifying record to the FBI, if such a submission would be appropriate and permissible under state law.<sup>93</sup>

Nevertheless, the decision by the VA to submit VBA records on "mentally incompetent" veterans to the FBI for inclusion in the NICS mental defective file generated some degree of controversy in 1999 and 2000.<sup>94</sup> Critics of this policy underscored that veterans routinely consented to "mentally incompetent" determinations so that a fiduciary (designated payee) could be appointed for them. Those critics contended that to take away a veteran's Second Amendment rights without his foreknowledge was improper. They also pointed out that no other federal agencies were providing similar disqualifying records to the FBI. This controversy subsided, but it re-emerged when Congress considered the NICS improvement amendments (described above). Also, as of April 30, 2008, VA records made up about one-fifth (or 21.0%) of the 552,800 federal and state records in the NICS mental defective file.

## **Public Housing and Firearms Possession and Use**

In the 110<sup>th</sup> Congress, the House passed a bill (H.R. 6216) on July 9, 2008, that would have made changes related to the administration of the public housing program administered by the Department of Housing and Urban Development (HUD) through local public housing authorities (PHAs). The bill includes a provision that would have prohibited the HUD Secretary from accepting as reasonable any management or related fees charged by a PHA for enforcing any provision of a lease agreement that requires tenants to register firearms that are otherwise legally possessed, or that prohibits their possession outright. On the other hand, the bill would have allowed PHAs to terminate the lease of any tenant who was found to be illegally using a firearm.

The gun-related provision in H.R. 6216 reportedly reflected a compromise.<sup>95</sup> The original language restricting fees for enforcing gun restrictions was included in a motion to recommit offered during floor debate on a similar public housing bill (H.R. 3521). That bill was not approved by the House, but was sent back to the House Financial Services Committee for further consideration. A new version of the public housing bill (H.R. 5829) was introduced that included language from the motion to recommit, but it did not include the lease termination proviso, and the bill received no further consideration.

<sup>95</sup> Seth Stern, "House to Try Again on Public Housing Bill," *CQ Today*, July 8, 2008.

In the 111<sup>th</sup> Congress, the Financial Services Committee reported the Section 8 Voucher Reform Act of 2009 (H.R. 3045; H.Rept. 111-277) on July 23, 2009. In committee markup, Representative Price successfully amended the bill on July 9, 2009, with language that would have prevented authorities from prohibiting firearms in public housing. The committee approved another housing bill that included a similar provision (H.R. 4868) on July 27, 2010.

## **Concealed Carry and Reciprocity**

On July 22, 2009, the Senate considered an amendment (S.Amdt. 1618) offered by Senator Thune to the FY2010 Defense Authorization Act (S. 1390) that would have arguably provided for national reciprocity between states regarding the concealed carry of firearms. By agreement, the amendment needed 60 votes to pass, but it was narrowly defeated by a recorded vote, 58-39. Senator Thune introduced a similar bill, the Respecting States Rights and Concealed Carry Reciprocity Act of 2009 (S. 845).

As background, the issue of concealed carry under state law can be divided into four categories: (1) no permit required, (2) mandatory or “shall issue,” (3) discretionary or “may issue,” and (4) no concealed carry permitted. In Alaska and Vermont, state law allows concealed carry without a permit (no permit required). Thirty-five states have “shall issue” laws, in that the state issues the permit as long as the applicant meets the eligibility criteria.<sup>96</sup> Eleven states are “may issue” states, in that the state has discretion in whether to issue the permit.<sup>97</sup> Wisconsin and Illinois state laws prohibit the concealed carry of firearms by civilians under any circumstances.

Many states with concealed carry laws have extended concealed carry privileges, or reciprocity, to the residents of other states. According to the NRA, however, those concealed carry laws are often very technical and subject to change. Moreover, there are no national eligibility criteria, or training standards regarding concealed carry. Although the Thune amendment did not address the issue of national standards, it arguably would have required “may issue” states to honor the permits issued by “shall issue” states. By extension, it would also have required “shall issue” and “may issue” states to honor the eligibility of all residents of Alaska and Vermont to carry concealed firearms in their states, as long as those persons were not otherwise prohibited from possessing firearms.

## **Bankruptcy and Firearms**

Representative John A. Boccieri and Senator Leahy have introduced the Protecting Gun Owners in Bankruptcy Act of 2010 (H.R. 5827/S. 3654). This proposal would have amended federal bankruptcy law to allow a person who chooses to use a federal bankruptcy exemption, instead of a state exemption, to exempt specifically either a single firearm or a collection of firearms of up to \$3,000 in value from a bankruptcy estate. This exemption *would not* have reduced the total exempted amount allowable for other property. In addition, this proposal would have amended

---

<sup>96</sup> “Shall issue” states include Alaska, Arizona, Arkansas, Colorado, Florida, Georgia, Idaho, Indiana, Kansas, Kentucky, Louisiana, Maine, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, and Wyoming.

<sup>97</sup> “May issue” states include Alabama, Connecticut, and Iowa. The following states are restrictive may issue states: California, Delaware, Hawaii, Maryland, Massachusetts, New Jersey, New York, and Rhode Island.

the federal definition of “household goods” and allowed a person to include either a single firearm or a collection of firearms of up to \$3,000 in value as part of their household goods exemption. However, using this exemption *would* have reduced the amount of other household goods that could be exempted under federal law. On July 28, 2010, the House passed H.R. 5827 by a roll call vote (two-thirds required) of 307-113 (Roll no. 479).

## **ATF Appropriations and Southwest Border Gun Trafficking**

The 111<sup>th</sup> Congress considered legislation to either fund ATF or authorize increased appropriations for the agency. The ATF enforces federal criminal law related to the manufacture, importation, and distribution of alcohol, tobacco, firearms, and explosives. ATF works both independently and through partnerships with industry groups; international, state, and local governments; and other federal agencies to investigate and reduce crime involving firearms and explosives, acts of arson, and illegal trafficking of alcohol and tobacco products.

### **ATF Appropriations Budget Request for FY2011<sup>98</sup>**

The President’s FY2011 budget request includes \$1.163 billion for ATF, an increase of \$42.2 million, or 3.8%, compared to the FY2010-enacted appropriation. Proposed increases (over base) include \$11.8 million for Project Gunrunner<sup>99</sup> and \$1.2 million for Emergency Support Function #13 (ESF-13), the Public Safety and Security Annex to the National Response Framework (NRF).<sup>100</sup> The NRF sets broad responsibilities and lines of authority for federal agencies in the event of a national emergency or major disaster. Under the NRF, the Attorney General is responsible for ESF-13, which entails all hazards law enforcement planning and coordination for the entire United States and its territories. The Attorney General, in turn, has delegated his responsibility for ESF-13’s implementation to the ATF. On July 22, 2010, the Senate Appropriations Committee reported an FY2011 CJS appropriations bill (S. 3636; S.Rept. 111-229). This measure would provide ATF with \$1.163 billion for FY2011, matching the Administration’s request. On July 22, 2010, the Senate Appropriations Committee marked up and reported the FY2011 Commerce, Justice, Science, and Related Agencies (CJS) appropriations bill (S. 3636). The Senate bill would match the Administration’s request. In the absence of an enacted CJS appropriations bill, Congress has passed continuing resolutions, which the President has signed into law (P.L. 111-242 and P.L. 111-290).

### **ATF Appropriations for FY2010<sup>101</sup>**

For FY2010, the Administration requested \$1.121 billion and 5,025 full-time equivalent (FTE) positions for ATF, or \$66.6 million and 68 FTE positions more than the amounts appropriated for FY2009 (\$1.054 billion and 4,957). Of the difference, \$23.6 million and 22 FTE positions were

---

<sup>99</sup> For further information on Operation Gunrunner, see CRS Report R40733, *Gun Trafficking and the Southwest Border*, by Vivian S. Chu and William J. Krouse.

<sup>100</sup> For more information, see CRS Report RL34758, *The National Response Framework: Overview and Possible Issues for Congress*, by Bruce R. Lindsay.

<sup>101</sup> For further information, see CRS Report RL34514, *The Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF): Budget and Operations for FY2008, FY2009, and FY2010*, by William J. Krouse.

base adjustments. For Southwest border enforcement, the FY2010 request included a budget enhancement of \$18 million to support Project Gunrunner and \$25 million for the new National Center for Explosives Training and Research Center (NCETR). Compared to the enacted FY2009 level of funding, the FY2010 request would have provided a 4.9% increase.

For ATF, Congress appropriated \$1.121 billion in the Consolidated Appropriations Act, 2010 (H.R. 3288). The President signed this bill into law on December 16, 2009 (P.L. 111-117).<sup>102</sup> The act provided an amount that was equal to the Administration's request. This amount was \$52.5 million more than the final FY2009-enacted amount, or an increase of 4.9%. Conference report language (H.Rept. 111-366) indicated that the act included \$18 million for Project Gunrunner, the same amount requested by the Administration. In addition, the act also included \$10 million to increase the Violent Crime Impact Team program, \$6 million for construction (phase two) of the NCETR, and \$1.5 million to complete ATF headquarters construction projects.

On July 28, 2010, the House passed an FY2010 supplemental appropriations bill (H.R. 5875) that included \$39.1 million for ATF to increase Southwest border gun trafficking investigations. On August 5, 2010, the Senate passed its version of H.R. 5875, which included \$37.5 million for ATF. On August 9, the House introduced a new border security supplemental bill (H.R. 6080), which was subsequently passed by the House on August 10. This bill contained language identical to Senate-passed H.R. 5875. Reportedly, the House took up the bill with a new number to avoid a dispute related to its constitutional obligation to originate all revenue measures.<sup>103</sup> This dispute arose with the addition of funding provisions in Senate-passed H.R. 5875 that were not included in the House-passed version. On August 12, the Senate passed H.R. 6080. On August 13, the President signed H.R. 6080 into law (P.L. 111-230). It provides ATF with an additional \$37.5 million for Project Gunrunner.

## **Southwest Border Gun Trafficking**

On the Southwest border with Mexico, firearms violence has spiked sharply in recent years as drug trafficking organizations have reportedly vied for control of key smuggling corridors into the United States. In March 2008, President Felipe Calderón called on the United States to increase its efforts to suppress gun trafficking from the United States into Mexico. In the 110<sup>th</sup> Congress, the House passed a bill (H.R. 6028) that would authorize a total of \$73.5 million to be appropriated over three years, for FY2008 through FY2010, to increase ATF resources dedicated to stemming illegal gun trafficking into Mexico as part of the Mérida Initiative.<sup>104</sup> Similar authorizations were included in S. 2867, H.R. 5863, and H.R. 5869. In the 111<sup>th</sup> Congress, similar authorizations were included in several bills (S. 205, H.R. 495, H.R. 1448, and H.R. 1867).

---

<sup>102</sup> The conference report on the bill includes provisions for six of the seven FY2010 appropriations: Transportation-HUD; Commerce-Justice-Science; Financial Services; Labor-HHS; Military Construction-VA; and State-Foreign Operations. The Defense appropriations bill, H.R. 3326, was passed separately.

<sup>104</sup> For further information, see CRS Report RS22837, *Mérida Initiative: U.S. Anticrime and Counterdrug Assistance for Mexico and Central America*, by Clare Ribando Seelke.

## **Tiahrt Amendment and Firearms Trace Data Limitations**

Representative Todd Tiahrt offered an amendment that placed several funding restrictions and conditions on ATF and the FBI during full committee markup of the FY2004 DOJ appropriations bill (H.R. 2799). While modified, those restrictions were included in the Consolidated Appropriations Act, 2004 (P.L. 108-199). Amended to the ATF appropriations every year since (FY2005-FY2010) and with language making them permanent law, the Tiahrt restrictions

- prohibit the use of any funding appropriated for ATF to disclose firearms trace or multiple handgun sales report data for any purpose other than supporting “bona fide” criminal investigation or agency licensing proceedings,
- prohibit the use of any funding appropriated for ATF to issue new regulations that would require licensed dealers to conduct physical inventories of their businesses, and
- require the next-day destruction of approved Brady background check records.

Of these limitations, the first, dealing with disclosure of firearms trace or multiple handgun sales report data, probably was and is the most contentious. A coalition of U.S. mayors, including New York City Mayor Michael Bloomberg, maintain that they should have access to such data in order to identify out-of-state federally licensed gun dealers who wittingly or unwittingly sell large numbers of firearms to illegal gun traffickers.

For FY2008, the Tiahrt limitation on firearms trace and multiple handgun sales report data was the source of debate when the Senate CJS Appropriations Subcommittee did not include this limitation in its draft bill. Senator Richard Shelby amended the FY2008 CJS appropriations bill (which became S. 1745) with similar, but modified, limitations in full committee markup. Similar language was included in the House-passed CJS appropriations bill (H.R. 3093), and was included in the Consolidated Appropriations Act, 2008 (P.L. 110-161; H.R. 2764), into which the CJS appropriations were folded.<sup>105</sup> The modified FY2008 limitation included new language that authorizes ATF to

- share firearms trace data with tribal and foreign law enforcement agencies and federal agencies for national intelligence purposes;
- share firearms trace data with law enforcement agencies and prosecutors to exchange among themselves; and
- release aggregate statistics on firearms traffickers and trafficking channels, or firearms misuse, felons, and trafficking investigations.

The FY2008 limitation, however, continued to prohibit the release of firearms trace data for the purposes of suing gun manufacturers and dealers. Moreover, the limitation includes the phrase “in fiscal year 2008 and thereafter,” which makes the limitation permanent law according to the Government Accountability Office (GAO).<sup>106</sup> Despite the permanency of these limitations,

---

<sup>105</sup> For further information, see CRS Report RS22458, *Gun Control: Statutory Disclosure Limitations on ATF Firearms Trace Data and Multiple Handgun Sales Reports*, by William J. Krouse.

<sup>106</sup> U.S. Government Accountability Office, “Bureau of Alcohol, Tobacco, Firearms, and Explosives—Prohibition in the 2008 Consolidated Appropriations Act,” July 15, 2008, available at <http://www.gao.gov/decisions/appro/316510.pdf>.

Congress has modified their language and included them in the FY2009 and FY2010 Commerce, Justice, Science (CJS), and Related Agencies Appropriations Acts (P.L. 111-8 and P.L. 111-117).

## Other Salient Gun Control Legislative Issues

Other salient firearms-related issues that continue to receive attention include (1) denying firearms and explosives to persons watch-listed as known or suspected terrorists, (2) retaining Brady background check records for approved firearms transactions to enhance terrorist screening, (3) more-strictly regulating certain long-range .50 caliber rifles, (4) further regulating certain firearms previously defined in statute as “assault weapons,” and (5) requiring background checks for private firearms transfers at gun shows.

### Brady Background and Terrorist Watch List Checks<sup>107</sup>

On November 5, 2009, U.S. Army Major Nidal Malik Hasan shot 13 persons to death and wounded over 30 at Fort Hood, TX. Prior to the shootings, Hasan had corresponded by email with a radical Muslim imam, Anwar al-Aulaqi, who U.S. authorities had long suspected of having substantial ties to al-Qaeda.<sup>108</sup> Although FBI counterterrorism agents were aware of Hasan’s communications with al-Aulaqi,<sup>109</sup> it was unclear at what level Hasan was being scrutinized by the FBI.<sup>110</sup> If he had been the subject of a full counterterrorism investigation, FBI policy would have required that he be watch-listed.<sup>111</sup> Depending upon the sequence of events, had Hasan been watch-listed, there is a possibility that his purchase of a pistol<sup>112</sup> and the required Brady background check could have alerted FBI counterterrorism agents to that transfer, and they might have been able to take steps that would have prevented the shootings. The Fort Hood shootings renewed interest in the U.S. government’s use of terrorist watch lists for firearms- and explosives-related background checks.<sup>113</sup>

---

<sup>107</sup> For further information, see CRS Report RL33011, *Terrorist Screening and Brady Background Checks for Firearms*, by William J. Krouse.

<sup>108</sup> Carrie Johnson, Spencer C. Hsu, and Ellen Nakashima, “Hasan Had Intensified Contact with Cleric: FBI Monitored E-mail Exchanges Fort Hood Suspect Raised Prospect of Financial Transfers,” *Washington Post*, November 21, 2009, p. A01.

<sup>110</sup> According to a November 11, 2009, FBI press release, Hasan’s communications with Anwar al-Aulaqi were assessed by the FBI in connection with an investigation of another subject, and the content of those communications was explainable by his research as a psychiatrist at the Walter Reed Medical Center and nothing else derogatory was found that would have suggested that he was involved in terrorist activities or planning. U.S. Department of Justice, Federal Bureau of Investigation, “Investigation Continues Into Fort Hood Shooting,” November 11, 2009.

## Post-9/11 Modified NICS Procedures

Before February 2004, terrorist watch list checks were not part of the Brady background check process because being a suspected or known terrorist was and is not a disqualifying factor for firearms transfer/possession eligibility under federal or state law. As is the case today, to determine such eligibility, the National Instant Criminal Background Checks System (NICS) queries three databases maintained by the FBI. They include the National Crime Information Center (NCIC), the Interstate Identification Index (III), and the NICS index. The NICS index includes disqualifying records on persons (1) dishonorably discharged from the Armed Forces, (2) adjudicated as a mental defective, or (3) convicted of certain serious immigration violations, among others. The III contains criminal history records for persons arrested and convicted of felonies and certain serious misdemeanors. The NCIC contains law enforcement “hot files” on fugitives and persons subject to restraining orders, among other persons. NCIC also contains a hot file known as the Violent Gang and Terrorist Offender File (VGTOF). Prior to the 9/11 attacks, this file included *limited* information on known or suspected terrorists and gang members. NICS examiners were not informed of VGTOF hits, as such information was not considered relevant to determining firearms transfer/possession eligibility.

In November 2002, DOJ initiated a NICS transaction audit to determine whether prohibited aliens (non-citizens) were being improperly transferred firearms.<sup>114</sup> As part of this audit, NICS procedures were changed so that NICS examiners would be informed of VGTOF hits. Under Homeland Security Presidential Directive 6, moreover, the Administration initiated a broad-based review of the use of watch lists, among other terrorist identification and screening mechanisms.<sup>115</sup> In September 2003, the FBI-administered Terrorist Screening Center (TSC) was established and work was begun to improve and merge several watch lists maintained by the U.S. government into a consolidated Terrorist Screening Database (TSDB).<sup>116</sup> Following those efforts, TSDB lookout records from other agency watch lists were downloaded into VGTOF. By May 2007, VGTOF contained more than 100,000 records.<sup>117</sup> In 2009, the FBI created a separate hot file for “known and appropriately suspected terrorists (KST)” by splitting VGTOF into separate gang and terrorist files.<sup>118</sup> As of March 31, 2010, the KST included 278,219 terrorist watch list records.<sup>119</sup>

In November 2003, DOJ directed the FBI to revise its NICS procedures to include measures to screen prospective firearms transferees and permittees against terrorist watch list records (KST, formerly VGTOF).<sup>120</sup> Effective February 2004, the Brady background check process was altered to include a terrorist watch list check and to alert NICS staff when a prospective firearms transferee or permit applicant is potentially identified as a known or suspected terrorist.<sup>121</sup> In the

case of a watch list hit, NICS sends a delayed transfer (for up to three business days) response to the querying FFL or POC. If NICS examiners cannot find a prohibiting factor, they immediately contact the TSC and FBI Counterterrorism Division (CTD) to (1) validate the hit and (2) allow FBI Special Agents in the field to check for possible prohibiting factors. If no prohibiting factors are uncovered within the three-day period, a firearms dealer may proceed with the transaction at his discretion, but FBI counterterrorism officials continue to work the case for up to 90 days, during which time the background check is considered to be in an “open” status.<sup>122</sup>

If and when a transaction is approved, all identifying information submitted by or on behalf of the transferee is destroyed within 24 hours.<sup>123</sup> At the end of the 90-day period, if no prohibiting factor has been reported to the NICS Center, all records related to the NICS transaction are destroyed except for the NICS Transaction Number (NTN) and date of the transaction.<sup>124</sup> If the FFL proceeded with the transaction at his discretion following three business days and the applicant is found to be disqualified, then the ATF will be notified and a firearms retrieval action will be initiated in coordination with a JTTF.

### **Possible Issues for Congress and Related Legislative Proposals**

When Congress passed the Brady Act in 1994, the use of terrorist watch lists during firearms-related background checks was not considered. As a consequence, the Attorney General has no specific statutory authority to screen prospective gun buyers against terrorist watch list records. Nevertheless, the FBI adopted procedures to do this because being on such a list suggests that there may be an underlying factor that would bar a prospective background check applicant from possessing a firearm. Hence, a possible issue for Congress could be whether terrorist watch list checks should be incorporated statutorily into the Brady background checks for firearms.

In addition, a proviso attached to the FY2005 DOJ annual appropriation and every year thereafter requires that NICS-generated approved firearms transaction records be destroyed within 24 hours.<sup>125</sup> Nevertheless, as described above, the FBI has been retaining approved firearms transaction records for up to 90 days, if those records are related to terrorist watch list hits. Furthermore, information on the subjects of those checks are passed on to FBI investigators in the field. While the NICS records are eventually destroyed for non-denials, it is unknown what happens to the information generated by valid NICS-related terrorist watch list hits that are passed on to the FBI CTD and Special Agents in the field, who are usually assigned to Joint Terrorism Task Forces. Information about those firearms transactions is possibly recorded and stored electronically in the FBI’s investigative case files.

In the Brady Act, however, there is a provision that prohibits the (1) transfer of any Brady system record to any other federal or state agency, or (2) the use of the Brady system as a national registry of firearms or firearms owners.<sup>126</sup> In light of the former prohibition, a second issue for

---

<sup>122</sup> U.S. Government Accountability Office, *Gun Control and Terrorism: FBI Could Better Manage Firearm-Related Background Checks Involving Terrorist Watch List Records*, GAO-05-127, January 2005, p. 32.

<sup>123</sup> 28 C.F.R. § 25.9(b)(1)(iii).

<sup>124</sup> 28 C.F.R. § 25.9(b)(1)(ii).

<sup>125</sup> For FY2009, see section 511 of the Omnibus Appropriations Act, 2009, (P.L. 111-8, 123 Stat. 596).

<sup>126</sup> For example, subsection 103(i) of the Brady Act (P.L. 103-159; 107 Stat. 1542) includes the following provision: PROHIBITION RELATING TO ESTABLISHMENT OF REGISTRATION SYSTEMS WITH RESPECT TO FIREARMS. – No department, agency, officer, or employee of the United States may – (1) require that any record or (continued...)

Congress could be whether to grant the FBI greater authority to maintain and access NICS records for the purposes of counterterrorism, or should existing statutory limitations that were arguably designed to prevent the maintenance of and access to such records be strengthened. In light of the first two issues, it follows that a third issue for Congress could be whether the Attorney General should be given explicit authority to deny firearms transfers to watch-listed persons on a case-by-case basis, or should all known and suspected terrorists be statutorily prohibited from possessing firearms and explosives.

Several legislative proposals were introduced in the 111<sup>th</sup> Congress that would have addressed Brady background and terrorist watch list checks. Although none of these bills would have directly addressed whether terrorist watch list checks should have been incorporated statutorily into the Brady background check process, several proposals would have either granted the FBI greater authority to maintain, store, and access NICS records related to positive watch list encounters, or would have authorized the Attorney General to deny a firearms transfer based solely on a terrorist watch list hit. With regard to NICS record retention, Senator Lautenberg introduced a bill (S. 2820) that would have authorized any federal or state official to maintain any NICS records that resulted in a terrorist watch list hit for a minimum of 10 years, regardless of whether the actual background check had resulted in an approved firearms transfer. This bill also would have authorized the FBI to maintain NICS records on approved firearms transfers for not less than 180 days.<sup>127</sup>

Representative McCarthy reintroduced a bill (H.R. 2401) that would have made it unlawful for anyone to transfer a firearm to a person who was on the “No Fly” lists maintained by the TSA. The bill also would have prohibited such a person from shipping, transporting, possessing, or receiving a firearm. Representative McCarthy introduced the same proposal in the 109<sup>th</sup> and 110<sup>th</sup> Congresses (H.R. 1195 and H.R. 1167).

Senator Lautenberg and Representative King reintroduced the Denying Firearms and Explosives to Dangerous Terrorists Act of 2009 (H.R. 2159/S. 1317). This bill has been dubbed the “Terror Gap” bill. As in the 110<sup>th</sup> Congress, the language of this bill reflects a DOJ-drafted proposal.<sup>128</sup>

---

(...continued)

portion thereof generated by the system established under this section be recorded at or transferred to a facility owned, managed, or controlled by the United States or any State or political subdivision thereof; or (2) use the system established under this section to establish any system for the registration of firearms, firearm owners, or firearm transaction or disposition, except with respect to persons, prohibited by section 922 (g) or (n) of title 18, United States Code or State law, from receiving a firearm.

<sup>127</sup> In the 110<sup>th</sup> Congress, Senator Lautenberg introduced a bill (S. 2935) that would have authorized the Attorney General to retain firearms transfer records on persons who were suspected terrorists or their supporters, but who have been transferred a firearm. Senator Lautenberg also introduced a bill (S. 2820) that would authorize federal or state officials to maintain any NICS records that resulted in a terrorist watch list hit for a minimum of 10 years, and the FBI to maintain NICS records on approved firearms transfers for not less than 180 days.

In the 109<sup>th</sup> Congress, Senator Lautenberg and Representative John Conyers introduced the Terrorist Apprehension and Record Retention Act of 2005 (S. 578/H.R. 1225). This proposal would have (1) required that the FBI, along with appropriate federal and state counterterrorism officials, be notified immediately when the NICS indicated that a person seeking to obtain a firearm was a known or suspected terrorist; (2) required that the FBI coordinate the response to such occurrences, (3) authorized the retention of all related records for at least 10 years, and (4) allowed federal and state officials access to such records. Representative Peter King introduced H.R. 1168, a bill that would have required the Attorney General to promulgate regulations to preserve records of terrorist- and gang-related record hits during such background checks until they were provided to the FBI.

<sup>128</sup> U.S. Department of Justice, Office of Legislative Affairs, letter to the Honorable Richard B. Cheney, President, United States Senate, from Richard A. Hertling, Acting Assistant Attorney General, April 25, 2007.

This proposal would have granted the Attorney General discretionary authority to deny a firearms transfer or state-issued firearms permit to any applicant undergoing a NICS background check for either a firearms transfer or state-issued firearms permit, if the Attorney General determined that the applicant was a “dangerous terrorist.” Senator Lautenberg and Representative King introduced similar bills in the 110<sup>th</sup> Congress (S. 1237/H.R. 2074). In the 112<sup>th</sup> Congress, Senator Lautenberg has reintroduced this measure (S. 34).

## **Senate Homeland Security and Governmental Affairs Committee Hearing**

On May 5, 2010, the Senate Committee on Homeland Security and Governmental Affairs held a hearing on “Terrorists and Guns: The Nature of the Threat and Proposed Reforms.” GAO testified about measures taken by the FBI to improved firearms and explosives background checks for counterterrorism purposes.<sup>129</sup> GAO reported that from February 2004 through February 2010, there were 1,228 positive encounters with individuals watch-listed as terrorists through NICS related firearms or explosives transactions.<sup>130</sup> These encounters involved 650 individuals because 450 of these individuals were involved in multiple transactions.<sup>131</sup> Six of these individuals were involved in 10 or more transactions.<sup>132</sup> In 1,119 encounters, the transactions were allowed to proceed.<sup>133</sup> In 109 encounters, the transactions were denied.<sup>134</sup> From March 2009 to February 2009, moreover, there were 272 positive encounters and all of the transactions were allowed to proceed, including one that involved explosives.<sup>135</sup>

Senator Joseph Lieberman, chair of the committee, noted that firearms had been used in at least two deadly terrorist plots perpetrated by Muslim extremists. Those incidents included the Fort Hood shootings noted above and the June 2009 Little Rock, AR, recruiting center shootings, where two U.S. servicemen were shot—one was killed and the other wounded. In several other thwarted plots, conspirators were arrested for planning to use firearms to attack servicemen at Fort Dix, NJ, in 2006 and the Quantico, VA, Marine base in 2009.<sup>136</sup> Senator Lindsey Graham, however, voiced opposition to the Terror Gap proposal. He maintained that denying a firearms transfer based upon a felony conviction in a lawful court was fundamentally different from doing so based on a terrorist watch list record that was created by an investigator or intelligence analyst.<sup>137</sup>

## **ATF Modernization Act**

On at least two occasions, the Senate Judiciary Committee postponed hearings on the Bureau of Alcohol, Tobacco, Firearms and Explosives Reform and Firearms Modernization Act (S. 941).

---

<sup>129</sup> U.S. Government Accountability Office, *Terrorist Watchlist Screening: FBI Has Enhanced Its Use of Information from Firearm and Explosives Background Checks to Support Counterterrorism Efforts*, GAO-10-703T, May 5, 2010.

<sup>130</sup> *Ibid.* p. 5.

<sup>131</sup> *Ibid.*

<sup>132</sup> *Ibid.*

<sup>133</sup> *Ibid.*

<sup>134</sup> *Ibid.*

<sup>135</sup> *Ibid.*, p. 2.

<sup>136</sup> U.S. Senate, Senate Committee on Homeland Security and Governmental Affairs, *Hearing on Terrorist Threat and Guns*, 111<sup>th</sup> Congress, 2<sup>nd</sup> Session, May 5, 2010 (*CQ Congressional Transcripts*).

<sup>137</sup> *Ibid.*

Senator Mike Crapo and Senator Patrick Leahy, Chair of the Judiciary Committee, introduced this bill on April 30, 2009. Representatives Steve King and Zack Space introduced a companion bill (H.R. 2296). In regard to regulating federally licensed firearms dealers, this proposal would have

- established a two tier, graduated penalty system for violations characterized as being of a minor or serious nature;
- established a process by which ATF licensing decisions could be reviewed by an administrative law judge;
- required the Attorney General to issue guidelines governing ATF investigations of GCA violations; and
- defined the “willful” standard of intent to mean “knowingly and intentionally” disregarding a “legal duty.”

Proponents for this proposal argue that these provisions would allow federal firearms licensees greater opportunity to address non-substantive recordkeeping issues that under current law could lead to the revocation of their licenses. Opponents argue that relaxing such provisions would weaken ATF authority and efforts to reduce the number of “kitchen table top” dealers, who are not substantively engaged in the business and, hence, are ineligible for such licenses, and “rogue” dealers, who are not adequately controlling and accounting for their firearms inventories.<sup>138</sup> Additional provisions in the bill would have addressed several other firearms-related issues concerning machine guns, firearms parts, and handgun possession of a minor in the presence of a parent or legal guardian.

## **Gun Shows and Private Firearms Transfers**

Federal law does not regulate gun shows specifically. Federal law regulating firearms transfers, however, is applicable to such transfers at gun shows. Federal firearms licensees—those licensed by the federal government to manufacture, import, or deal in firearms—are required to conduct background checks on non-licensed persons seeking to obtain firearms from them, by purchase or exchange. Conversely, non-licensed persons—those persons who transfer firearms but who do not meet the statutory test of being engaged in the business—are not required to conduct such checks. To some, this may appear to be an incongruity in the law. Why, they ask, should licensees be required to conduct background checks at gun shows but not non-licensees? To those opposed to further federal regulation of firearms, it may appear to be a continuance of the status quo (i.e., non-interference by the federal government into private firearms transfers within state lines). On the other hand, those seeking to increase federal regulation of firearms may view the absence of background checks for firearms transfers between non-licensed/private persons as a loophole in the law that needs to be closed. A possible issue for Congress is whether federal regulation of

---

<sup>138</sup> In the 109<sup>th</sup> Congress, Representative Howard Coble, chair of the House Judiciary Subcommittee on Crime, Terrorism, and Homeland Security, and Representative Robert Scott, the subcommittee’s ranking minority member, introduced the ATFE Modernization and Reform Act of 2006 (H.R. 5092) on April 5, 2006. H.R. 5092 was approved by the Crime subcommittee on May 3, 2006. The House Judiciary Committee ordered this bill reported on September 7, and a written report was filed on September 21 (H.Rept. 109-672). The House passed this bill on September 26, 2006, by a recorded vote of 277-131 (Roll no. 476), but no further action was taken on this bill. Also see U.S. Congress, House Committee on the Judiciary, Subcommittee on Crime, Terrorism, and Homeland Security, *The Bureau of Alcohol, Tobacco, Firearms and Explosives (BATFE): Gun Show Enforcement (Parts 1 and 2)*, 109<sup>th</sup> Cong., 2<sup>nd</sup> sess., February 15 and 28, 2006, H.Hrg. 109-123 (Washington: GPO, 2006).

firearms should be expanded to include private firearms transfers at gun shows and other similar venues.

Among gun show-related proposals, there are two basic models. The first model is based on a bill (S. 443) that was introduced in the 106<sup>th</sup> Congress by Senator Lautenberg, who successfully offered this proposal as an amendment to the Senate-passed Violent and Repeat Juvenile Offender Act (S. 254). Several members introduced variations of the Lautenberg bill in the 107<sup>th</sup> Congress. In the 108<sup>th</sup> Congress, Representative Conyers—ranking minority member of the Judiciary Committee—introduced H.R. 260, which was very similar to the Lautenberg bill. In addition, former Senator Daschle introduced the Justice Enhancement and Domestic Security Act of 2003 (S. 22), which included gun show language that was similar to the Lautenberg bill. The second model is based on a bill (S. 890) introduced in the 107<sup>th</sup> Congress by Senators McCain and Lieberman.<sup>139</sup> In the 110<sup>th</sup> Congress, Representative Michael Castle reintroduced this bill as the Gun Show Loophole Closing Act of 2005 (H.R. 96). Senator Lautenberg reintroduced his gun show proposal as the Gun Show Background Check Act 2008 (S. 2577). Senator Biden included similar provisions in the Crime Control and Prevention Act of 2007 (S. 2237). In the 111<sup>th</sup> Congress, Senator Lautenberg and Representative Castle reintroduced similar measures that would have required background checks for private firearms transfers at guns shows (S. 843 and H.R. 2324). In the 112<sup>th</sup> Congress, Senator Lautenberg has reintroduced this measure (S. 35).

## Expired Semiautomatic Assault Weapons Ban

In 1994, Congress banned for 10 years the possession, transfer, or further domestic manufacture of semiautomatic assault weapons (SAWs) and large-capacity ammunition feeding devices (LCAFDs) that hold more than 10 rounds that were not legally owned or available prior to the date of enactment (September 13, 1994). The SAW-LCAFD ban expired on September 13, 2004. The SAW ban statute classified a rifle as a semiautomatic assault weapon if it was able to accept a detachable magazine and included two or more of the following five characteristics: (1) a folding or telescoping stock, (2) a pistol grip, (3) a bayonet mount, (4) a muzzle flash suppressor or threaded barrel capable of accepting such a suppressor, or (5) a grenade launcher.<sup>140</sup> There were similar definitions for pistols and shotguns that were classified as semiautomatic assault weapons.<sup>141</sup> Semiautomatic assault weapons that were legally owned prior to the ban were not restricted and remained available for transfer under applicable federal and state laws. Opponents of the ban argue that the statutorily defined characteristics of a semiautomatic assault weapon were largely cosmetic, and that these weapons were potentially no more lethal than other semiautomatic firearms that were designed to accept a detachable magazine and were equal or superior in terms of ballistics and other performance characteristics. Proponents of the ban argue that semiautomatic military-style firearms, particularly those capable of accepting large-capacity ammunition feeding devices, had and have no place in the civilian gun stock.

During and following World War II, *assault rifles* were developed to provide a lighter infantry weapon that could fire more rounds, more rapidly (increased capacity and rate of fire). To increase capacity of fire, detachable self-feeding magazines were developed. These rifles were

---

<sup>139</sup> For further information, see CRS Report RL32249, *Gun Control: Proposals to Regulate Gun Shows*, by William J. Krouse and T.J. Halstead (archived).

<sup>140</sup> 18 U.S.C. § 921(a)(30)(B).

<sup>141</sup> 18 U.S.C. § 921(a)(30)(C) and (D).

usually designed to be fired in fully automatic mode, meaning that once the trigger is pulled, the weapon continues to fire rapidly until all the rounds in the magazine are expended or the trigger is released. Often these rifles were also designed with a “select fire” feature that allowed them to be fired in short bursts (e.g., three rounds per pull of the trigger), or in semiautomatic mode (i.e., one round per pull of the trigger), as well as in fully automatic mode. By comparison, semiautomatic firearms, including semiautomatic assault weapons, fire one round per pull of the trigger.

According to a 1997 survey of 203,300 state and federal prisoners who had been armed during the commission of the crimes for which they were incarcerated, fewer than 1 in 50, or less than 2%, used, carried, or possessed a semiautomatic assault weapon or machine gun.<sup>142</sup> Under current law, any firearm that can be fired in fully automatic mode or in multi-round bursts is classified as a “machine gun” and must be registered with the federal government under the National Firearms Act of 1934. Furthermore, it is illegal to assemble a machine gun with legally or illegally obtained parts. The population of legally owned machine guns has been frozen since 1986, and they were not covered by the semiautomatic assault weapons ban.

In the 108<sup>th</sup> Congress, proposals were introduced to extend or make permanent the ban, whereas other proposals were made to modify the definition of “semiautomatic assault weapon” to cover a greater number of firearms by reducing the number of features that would constitute such firearms, and expand the list of certain makes and models of firearms that are statutorily enumerated as banned. A proposal (S. 1034) introduced by Senator Dianne Feinstein would have made the ban permanent, as would have a proposal (H.R. 2038/S. 1431) introduced by Representative Carolyn McCarthy and Senator Frank Lautenberg. The latter measure, however, would have modified the definition and expanded the list of banned weapons. Senator Feinstein also introduced measures that would have extended the ban for 10 years (S. 2109/S. 2498). In addition, on March 2, 2004, the Senate passed an amendment to the gun industry liability bill (S. 1805) that would have extended the ban for 10 years, but the Senate did not pass this bill.<sup>143</sup> In the 109<sup>th</sup> Congress, Senator Dianne Feinstein introduced a bill that would have reinstated previous law for 10 years (S. 620). Representative McCarthy and Senator Lautenberg reintroduced their bills to make the ban permanent (H.R. 1312/S. 645).

In the 110<sup>th</sup> Congress, Representative McCarthy reintroduced a similar proposal (H.R. 1022) and another measure (H.R. 1859) that would prohibit the transfer of a semiautomatic assault weapon with a large-capacity ammunition feeding device, among other things. Representative Mark Steven Kirk introduced the Assault Weapons Ban Reauthorization Act of 2008 (H.R. 6257). Senator Biden included provisions to reauthorize the ban in the Crime Control and Prevention Act of 2007 (S. 2237). As described above, in the wake of the Tucson shootings, Representative McCarthy has introduced a measure that would reinstate the large capacity ammunition feeding device ban (H.R. 308). Senator Lautenberg has introduced a similar measure (S. 32).

## Long-Range .50 Caliber Rifles<sup>144</sup>

In the 109<sup>th</sup> Congress, legislation was introduced to regulate more strictly certain .50 caliber rifles. Some of these rifles are chambered to fire a relatively large round originally designed for the Browning Machine Gun (BMG) and have been adopted by the U.S. military as long-range “sniper” rifles. Gun control advocates argue that these firearms have little sporting, hunting, or recreational purpose. They maintain that these rifles could be used to shoot down aircraft, rupture pressurized chemical tanks, or penetrate armored personnel carriers. Gun control opponents counter that these rifles are expensive, cumbersome, and rarely, if ever, used to commit crimes. Furthermore, they maintain that these rifles were first developed for long-range marksmanship competitions and then adopted by the military as sniper rifles.

The Fifty Caliber Sniper Weapons Regulation Act of 2005 (S. 935), introduced by Senator Dianne Feinstein, would have amended the National Firearms Act (NFA)<sup>145</sup> to regulate “.50 caliber sniper weapons” in the same fashion as short-barreled shotguns and silencers by levying taxes on the manufacture and transfer of such firearms and by requiring owner and firearms registration. In the 110<sup>th</sup> Congress, Senator Feinstein introduced a similar measure (S. 1331).

The other proposal introduced by Representative James Moran, the 50 Caliber Sniper Rifle Reduction Act (H.R. 654), also would have amended the NFA to include those weapons, but it would have also amended the Gun Control Act<sup>146</sup> to effectively freeze the population of those weapons legally available to private persons and to prohibit any further transfer of those firearms. In other words, H.R. 654 would have grandfathered-in existing rifles but would have banned their further transfer. Consequently, the proposal would have eventually eliminated those rifles all together from the civilian gun stock. It would have been likely that covered .50 caliber rifles would have had to be destroyed or handed over to the ATF as contraband when the legal firearm owner died or wanted to give up the firearm. H.R. 654 included no compensation provision for rifles destroyed or handed over to the federal government.

Furthermore, both proposals (S. 935 and H.R. 654) would have defined “.50 caliber sniper weapon” to mean “a rifle capable of firing center-fire cartridge in .50 caliber, .50 BMG caliber, any other variant of .50 caliber or any metric equivalent of such calibers.” Many rifles, and even some handguns, are chambered to fire .50 caliber ammunition, meaning the projectile is about one-half inch in diameter. Opponents of this legislation note that this definition was very broad and would have likely covered .50 caliber rifles that would not be considered “long-range” or “sniper” rifles. The .50 BMG caliber round, on the other hand, is an exceptionally large cartridge (projectile and casing), which was once used almost exclusively as a heavy machine gun round. Representative Moran also offered an amendment to the FY2006 Department of Commerce appropriations bill (H.R. 2862) that would have prohibited the use of funding provided under that bill to process licenses to export .50 caliber rifles, but that amendment was not adopted by the House.

<sup>145</sup> 26 U.S.C., Chapter 53, § 5801 et seq.

<sup>146</sup> 18 U.S.C., Chapter 44, § 921 et seq.

## **Appendix. Major Federal Firearms and Related Statutes**

The following principal changes to the Gun Control Act have been enacted since 1968.

- The Firearms Owners Protection Act, McClure-Volkmer Amendments (P.L. 99-308, 1986), eases certain interstate transfer and shipment requirements for long guns, defines the term “engaged in the business,” eliminates some recordkeeping requirements, and bans the private possession of machine guns not legally owned prior to 1986.
- The Armor Piercing Ammunition Ban (P.L. 99-408, 1986, amended in P.L. 103-322, 1994) prohibits the manufacture, importation, and delivery of handgun ammunition composed of certain metal substances and certain full-jacketed ammunition.
- The Federal Energy Management Improvement Act of 1988 (P.L. 100-615) requires that all toys or firearm look-a-likes have a blazed orange plug in the barrel, denoting that it is a non-lethal imitation.
- The Undetectable Firearms Act (P.L. 100-649, 1988, amended by P.L. 108-174, 2003), also known as the “plastic gun” legislation, bans the manufacture, import, possession, and transfer of firearms not detectable by security devices.
- The Gun-Free School Zone Act of 1990 (P.L. 101-647), as originally enacted, was ruled unconstitutional by the U.S. Supreme Court (*United States v. Lopez*, 514 U.S. 549 (1995), April 26, 1995). The act prohibited possession of a firearm in a school zone (on the campus of a public or private school or within 1,000 feet of the grounds). In response to the Court’s finding that the act exceeded Congress’s authority to regulate commerce, the 104<sup>th</sup> Congress included a provision in P.L. 104-208 that amended the act to require federal prosecutors to include evidence that the firearms “moved in” or affected interstate commerce.
- The Brady Handgun Violence Prevention Act, 1993 (P.L. 103-159), requires that background checks be completed on all non-licensed persons seeking to obtain firearms from federal firearms licensees.
- The Violent Crime Control and Law Enforcement Act of 1994 (P.L. 103-322) prohibited the manufacture or importation of semiautomatic assault weapons and large-capacity ammunition feeding devices for 10 years. The act also bans the sale or transfer of handguns and handgun ammunition to, or possession of handguns and handgun ammunition by, juveniles (younger than 18 years old) without prior written consent from the juvenile’s parent or legal guardian; exceptions related to employment, ranching, farming, target practice, and hunting are provided. In addition, the act disqualifies persons under court orders related to domestic abuse from receiving a firearm from any person or possessing a firearm. It also increased penalties for the criminal use of firearms. The assault weapons ban expired on September 13, 2004.
- The Federal Domestic Violence Gun Ban (the Lautenberg Amendment, in the Omnibus Consolidated Appropriations Act for FY1997, P.L. 104-208) prohibits persons convicted of misdemeanor crimes of domestic violence from possessing

firearms and ammunition. The ban applies regardless of when the offense was adjudicated: prior to, or following enactment. It has been challenged in the federal courts, but these challenges have been defeated.<sup>147</sup>

- The Omnibus Consolidated and Emergency Appropriations Act, 1999 (P.L. 105-277), requires all federal firearms licensees to offer for sale gun storage and safety devices. It also bans firearms transfers to, or possession by, most non-immigrants and those non-immigrants who have overstayed the terms of their temporary visa.
- The Treasury, Postal and General Government Appropriations Act (P.L. 106-58) requires that background checks be conducted when former firearms owners seek to reacquire a firearm that they sold to a pawnshop.
- The Homeland Security Act of 2002 (P.L. 107-296) establishes a Bureau of Alcohol, Tobacco, Firearms and Explosives by transferring the law enforcement functions, but not the revenue functions, of the former Bureau of Alcohol, Tobacco and Firearms from the Department of the Treasury to the Department of Justice.
- The Law Enforcement Officers Safety Act of 2004 (P.L. 108-277) provides that qualified active and retired law enforcement officers may carry a concealed firearm. This act supersedes state level prohibitions on concealed carry that would otherwise apply to law enforcement officers, but it does not override any federal laws. Nor does the act supersede or limit state laws that permit private persons or entities to prohibit or restrict the possession of concealed firearms on their property or prohibit or restrict the possession of firearms on any state or local government property, installation, building, base, or park.
- The Protection of Lawful Commerce in Arms Act (P.L. 109-92) prohibits certain types of lawsuits against firearms manufacturers and dealers to recover damages related to the criminal or unlawful use of their products (firearms and ammunition) by other persons.<sup>148</sup> This law also includes provisions that (1) increase penalties for using armor-piercing handgun ammunition in the commission of a crime of violence or drug trafficking and (2) require the Attorney General to submit a report (within two years of enactment) on “armor-piercing” ammunition based on certain performance characteristics, including barrel length and amount of propellant (gun powder).
- The Violence Against Women and Department of Justice Reauthorization Act of 2005 (P.L. 109-162) authorized to be appropriated for ATF the following amounts: \$924 million for FY2006, \$961 million for FY2007, \$999 million for FY2008, and \$1.039 billion for FY2009.
- The USA PATRIOT Improvement and Reauthorization Act of 2005 (P.L. 109-177) includes a provision that requires that the ATF Director be appointed by the President with the advice and consent of the Senate.

<sup>148</sup> For further information, see CRS Report RS22074, *Limiting Tort Liability of Gun Manufacturers and Gun Sellers: Legal Analysis of P.L. 109-92 (2005)*, by Henry Cohen.

- The Disaster Recovery Personal Protection Act of 2006, which was included in the Department of Homeland Security Appropriations Act, 2007 (P.L. 109-295), amended the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. § 5207) to prohibit federal officials from seizing or authorizing the seizure of any firearm from private persons during a major disaster or emergency if possession of that firearm was not already prohibited under federal or state law. It also forbids the same officials from prohibiting the possession of any firearm that is not otherwise prohibited. Also, the law bans any prohibition on carrying firearms by persons who are otherwise permitted to legally carry such firearms because those persons are working under a federal agency, or under the control of an agency, providing disaster or emergency relief.
