WHO'S WHO

SPECIAL ADVERTORIAL SECTION

George Holt and Mike Duffy

SOLUTIONS GROUP INTERNATIONAL

With over 50 years of combined municipal and federal law enforcement experience and a continuing passion to “protect and serve,” Solutions Group International (SGI) founding partners George Holt and Mike Duffy lead a company which provides specialized security and protective services to high-net-worth families, corporations, institutions, consulates, and places of worship in California and throughout the United States, Europe, Africa, as well as Central & South America. As described by the partners, “We provide our service with a warrior’s spirit and a servant’s heart.”

For over a decade, Solutions Group International has managed steady growth, quickly evolving into one of the top security service providers in California catering to a very distinguished clientele. With a diverse workforce recruited from the law enforcement and military communities, SGI is capable of responding to the various concerns of their clients. From executive protection to estate security, or dealing with the threat of kidnappings and other criminal acts domestically or abroad, the men and women of Solutions Group International stand ready with the wisdom of experience, the ability to manage uncertainty, and an intricate network of valuable relationships. With an operational background forged from real world experience,

and having a varied skill set with vast resources, SGI provides their clients the confidence and peace of mind in knowing that their security service partner can respond to their needs with the highest level of resolve and professionalism.

As long time residents of Riverside County, the partners moved their headquarters from Beverly Hills to Riverside in the Hunter Park District. The SGI corporate offices are housed inside their state-of-the-art, 9,000 square foot Regional Training Center (RTC). This is the only training facility of its kind in the United States where you will find a CrossFit Gym, firearms training simulators, and a medical training lab all under one roof. The SGI Regional Training Center was designed and created to provide training to SGI security personnel. The SGI RTC also offers a litany of training opportunities to local first responders and the general public regardless of their skill or fitness level, to include courses designed specifically for children of all ages.

Our goal as a company is to cultivate a culture of preparedness and awareness, and to assist all of our clients in creating and sustaining an overall ethos of security.
